Vision & Concept

Janawaz is a digital public protest platform where public voice meets leadership response.

Slogan: 'Tuma awaaz, 10 lakh loka ra saath'

Goal: Voice > Support > Action > Accountability

Logo & Identity

- Raised fist in speech bubble
- Odisha map in background
- Colors: Deep Blue, Saffron, White
- Modern, powerful, and youth-driven

App Features

- Public can post issues
- 1M support = digital protest
- Netas can respond directly
- Volunteer & team structure
- Complete transparency model

Download Campaign Strategy

- Poster, reels, emotional storytelling
- Youth volunteer push (Janawaz Pracharak)
- Real success stories shared publicly
- Referral recognition system

Poster Design Overview

- Title: JANAWAZ
- Visual: Raised fist in speech bubble
- Slogan: 'Tuma awaaz, 10 lakh loka ra saath'
- App icons + QR/Link
- Clean, bold, modern

Next Steps

- Design final poster (after image limit resets)
- Prepare app demo video
- Share editable templates
- Start local volunteer onboarding

From

**Shri Dhaneswar Patra, OSS,
Deputy Secretary to Govt.,**

To

All Collectors.

Sub: *Publication of Final Gradation List of Panchayat Executive Officers (PEOs) for the year 2023.*

Madam/ Sir,

In inviting reference to the subject cited above, I am directed to say that the Final Gradation List of Panchayat Executive Officers (PEOs) for the year 2023 has been finalized after compliance of the objections/ omissions received in this Department in the stipulated time. As such, a copy of the Final Gradation List of Panchayat Executive Officers (PEOs) for the year 2023 is hereby annexed at Annexure- 'A' which may kindly be circulated among all concerned Officers.

It may be noted that the Final Gradation List of PEOs for the year 2023 has been made available in the website of Panchayati Raj and Drinking Water Department (<https://panchayat.odisha.gov.in>) for information of all concerned Officers.

Yours faithfully,

*Dhoneswar
04/04/23*

Deputy Secretary to Govt.

Memo No. 7335 / PR&DW, Dated 04.04.2023

Copy along with copy of enclosures forwarded to all CDO-cum-EO, Zilla Parishads/ All DPOs/ All BDOs for information and necessary action.

*Dhoneswar
04/04/23*
Deputy Secretary to Govt.

Memo No. 7336 / PR&DW, Dated 04.04.2023

Copy along with copy of enclosures forwarded to Under Secretary to Government (In-charge of E-Governance Section, PR&DW Deptt.) with a request to publish the above Final Gradation List in the Departmental website for information of all concerned.

*Dhoneswar
04/04/23*
Deputy Secretary to Govt.

Annexure-'A'

e-PROCUREMENT NOTICE**

BID IDENTIFICATION No: GMID-II/ 03/2024-25

1. Superintending Engineer, Minor Irrigation Division, Ganjam-II Berhampur on behalf of Governor of Odisha invites **on-line percentage rate tender** for the Construction of Minor Irrigation Projects works through e-procurement as per Annexure to this bid Notice. The bid should be submitted online in the website www.tendersorissa.gov.in by "B" & "C" Classes of contractor. The bidders should have necessary Portal Enrolment (with his own Digital Signature Certificate). The registered bidders of outside Odisha can also participate in this process after necessary Portal Enrolment, but shall have to subsequently undergo registration with the appropriate authority of the State Government within a month of acceptance of bid.

Procurement Officer	Bid Identification No.	Availability of tender on line for bidding		Date and Time of opening of Tender
		From	to	
1	2	3	4	5
Superintending Engineer, Minor Irrigation Division, Ganjam-II, Berhampur	GMID-II/ 03/2024-25	27.08.2024 at 10.00 A.M.	09.09.2024 4 up to 5 PM	10.09.2024 at 11.30 AM

Bid documents consisting of qualification information and eligibility criterion of bidders, the schedule of quantities of estimate of the various classes of work is available in website www.tendersorissa.gov.in from **27.08.2024 to 09.09.2024** up to **5.00 P.M.** The set of terms and conditions are also available in the web site till last date of submission of Bid.

2. The bid for the work shall remain open for acceptance for a period of ninety days from the last date of receipt of bids. If any Bidder / Tenderer withdraws his bid/ tender before the said period or makes any modifications in the terms and conditions of the bid, the said earnest money shall stand forfeited. Conditional Bid is subject to forfeiture of E.M.D.
3. E.M.D. required to be deposited online. Instructions to be followed for online payment available in the e-Procurement portal during the processing of tender by the bidder. Tenderers desire to hire machineries or equipment from outside the state are required to furnish 2% of the amount put to tender as bid security.
4. **Exemption of E.M.D.** To avail the exemption of E.M.D, the intending Engineering contractor should have to furnish an affidavit to the effect that he has not been awarded works maximum up to 3 Nos. During the current financial year along with the tender paper failing which their case will not be considered for exemption of EMD. The successful Engineering Contractor shall have to submit the original registration licence before drawl of agreement for making necessary entry in it towards EMD exemption failing which his tender will be cancelled and the registration authority will be moved for taking penal action against him.
5. **Additional Performance Security** shall be obtained from the bidder when the bid amount is less than the estimated cost put to tender. In such an event, only the successful bidder who has quoted less bid price/rates than the estimated cost put to tender shall have to furnish the exact amount of the

APS in the rates as noted below in shape of **Post Office Savings Bank Account/National Savings Certificate/Post Office Time Deposit Account/KisanVikashPatra/Bank Guarantee** in favour of Divisional officer from any scheduled Bank in India counter guaranteed by its local branch at Bhubaneswar/ e-bank Guarantee executed on the National e-Government service limited (Nesl) Digital document execution portal duly pledged in favour of SuperintendingEngineer M.I.DivisionGanjam-II Berhampur within 7 (seven) days of issue of letter of acceptance (LAO) otherwise the bid shall be forfeited. Further proceeding for blacklisting shall be initiated against bidder as per works deptt. OM No 4559 dated 05.04.2021.

SI No	Range of difference between the estimated cost put to tender and Bid amount	Additional performance Security to be deposited by the successful bidder.
1	Below 5 %	No Additional performance Security.
2	From 5 % and above and Below 10%	50% of difference between estimated cost put to tender & Bid amount.
3	From 10% and above	150% of difference between estimated cost put to tender & Bid amount.

6. Bidders registered as SC, ST& P.H contractors desiring to avail concession(S) /price preference as per prevailing rules should also clearly mention regarding claim for avail such benefits in writing in shape of an affidavit and enclose necessary document and affidavit in support of their claim along with their bid, failing which their case will not be considered for availing price preference as per the above rule. No claim in this regard after opening of bid will be entertained.
7. If the rate quoted by the bidder is less than 15% of the tendered amount, then such a bid shall be rejected and the tender shall be finalized basing on the merits of rest of bids. But if more than one bid is quoted at **14.99% (decimals up to two numbers will be taken for all practical purposes)** less than the tendered amount, the tender will be finalized through a transparent lottery system in presence of all bidders/their authorized representatives, the Superintending Engineer and DAO.
8. If the rate quoted by the SC and ST category contractors come to 14.99 % (decimals up to two numbers will be taken for all practical purposes) less than the estimated cost after availing 10% price preference as per Para-2 of Works Department Resolution No. 27748 dt. 11.10.1977, then the tender shall be finalized by the tender accepting authority through a transparent lottery system along with other category of contractors whose rates are 14.99 % less than the estimated cost in presence of all bidders/ their authorised representatives, the SuperintendingEngineer and DAO.
9. No Engineer of Gazetted rank or other Gazetted officer employed in Engineering or Administrative duties in an Engineering Department of the state Government is allowed to work as a contractor for a period of two years after his retirement from Government service without Government Permission.
10. Other details can be seen in the bidding documents, which is available in website www.tenders.Orissa.gov.in.

11. Clear scanned copies of tender PAN, valid and active GSTN certificate, no relation certificate in shape of affidavit, original valid contractor registration certificate with online registration in CDMS portal, affidavit regarding authenticity of document, and affidavit to avail price preference in case of SC & ST contractors should be uploaded for each work separately along with the Bid document.
12. If L1 bidder does not turn up for agreement after finalization of the tender, then he shall be debarred from participation in bidding for three years and action will be taken to blacklist the contractor. In that case, the L2 bidder, if fulfills, other required criteria would be asked for drawing agreement for execution of the work if he negotiates at par with the rate quoted by the L1 bidder otherwise the tender will be cancelled. In case a contractor is black listed, it will be widely publicized and intimated to all department of Government and also to Govt. of India agencies working in the State.
13. Before acceptance of tender, the successful bidder will be required to submit a work programme and milestone basing on the financial achievement so as to complete the work within the stipulated time and in case of failure on the part of the agency to achieve the milestone liquidated damage will be imposed.
14. The original affidavit regarding correctness of all documents for each work separately should be made and scan copy of such affidavit is to be uploaded online failing which his tender will not be considered and rejected during opening of tender.
15. Consequent upon implementation GST with effect from 01.07.2017, the rate offered by the agency should be excluding all taxes and duties and including labour cess and royalty, G.S.T as applicable shall be paid extra and TDS as applicable shall be deducted from the bill.
16. The Scan copies of valid Regd. CDMS Certificate, valid and active GST registration certificate,PAN , affidavit including all required paper uploaded through website of the valid successful lowest bidder should be produced in original to the Superintending Engineer,M.I.Division,Ganjam-II, Berhampur within 5 days of opening of tender. In the eventuality of failure of the lowest successful bidder to produce the original document will be debarred in future from participating in tendering for 3 years and will be black listed by the competent authority.
17. The single tender received shall be cancelled without opening the bid in 1st call.
18. Agreement will be drawn/works will be taken up as per availability of funds.
19. The authority will not be held responsible for any technical snag or network failure during online bidding.
20. Quality control tests as per specification for all items of the work executed will be taken in nearby Government Quality Control Laboratories of Minor/ Medium/ Major Irrigation organization. It is binding on successful bidder to extend all necessary support in getting the tests done till completion of the work in all respect at his own cost.
21. Successful tenderer will be intimated for executing agreement.
22. The tenders will be processed/ considered as per office memorandum issued by the works Department Govt. of Odisha vide No. 12366 dated 08.11.2013.
23. As per works department memorandum no 17254 dated 05.12.2017 all bidder should pay the required tender paper cost and EMD through online mode only, instruction to be followed for online payment available in the e Procurement portal during processing of tender by the bidder.
24. If the office happens to be closed on the last date of closing or opening of the bids as specified, holiday in Government local authority the tenders will be closed or opened on the immediate next working day at same time and venue respectively, as the case may be.
25. Authority reserves the right to reject any or all the tenders without assigning any reasons thereof.

Procedure to participate in online bidding e-procurement

1. PARTICIPATING IN THE BID IN THE E-PROCUREMENT PORTAL: The Contractor/Bidder intending to participate in the bid is required to register in the Portal with some information about the firm/Contractor. This is a onetime activity for registering in Portal. During registration, the contractor has to attach a Digital Signature Certificate (DSC) to his / her unique user ID. The DSC used must be of appropriate class (Class II or Class III) issued from a registered Certifying Authority such as n-Code, Sify, TCS, MTNL etc.

a. To log on to the portal the Contractor/Bidder is required to type his/her *username* and password. *The system will again ask to* select the DSC and confirm it with the password of DSC. For each login, a user's DSC will be validated against its date of validity and also against the Certificate Revocation List (CRL) of respective CAs stored in system database. The system checks the unique ID, password and DSC combination and authenticates the login process for use of portal.

b. The tender documents uploaded by the Tender Inviting Officer in the website www.tendersorissa.gov.in will appear in the section of "Upcoming Tender" before the due date of tender sale. Once the due date has arrived, the tender will move to "Active Tender" Section of the *homepage*. Only a small notification will be published in the newspaper specifying the work details along with *mention* of the specific website for details. The publication of the tender will be for specific period of time till the last date of submission of bids as mentioned in the 'Invitation for Bid' after which the same will be removed from the list of Active tenders. Any bidder can view or download the bid documents from the web site.

c. Contractor exempted from payment of EMD will be able to participate in the tender directly by uploading documentary evidences towards his eligibility for such exemption. d. If the *software* application has the provision of payment of cost of tender document through payment gateways of *authorized* bankers by directly debiting the account of the bidders, bidders will be required to avail on-line payment.

1.1. Furnishing scanned copy of such documents is mandatory along with the tender documents otherwise his/her bid shall be declared as non-responsive and thus liable for rejection.

1.2. In the case of any failure, malfunction, or breakdown of the electronic system used during the e procurement process, the tender inviting officer shall not accept any responsibility for failures or breakdowns other than in those systems strictly within their own control.

1.3. Any third party/company/person under a service contract for operation of e-procurement system in the State or his/their subsidiaries or their parent companies shall be ineligible to participate in the procurement processes that are undertaken through the e-procurement system irrespective of who operates the system.

1.4. For submission of Bids through the E-Procurement Portal, the bidder shall up load the scanned copy/copies of document in prescribed format wherever warranted in support of eligibility criteria and qualification information. The on line bidder shall have to produce the original documents in support of the scanned copies and statements uploaded in the portal before the specified date as per DTCN.

1.5. Each bidder shall submit only one bid for one package. A bid is said to be complete if accompanied by cost of bid document and appropriate bid security. The system shall consider only the last bid submitted through the E-Procurement portal.

1.6. The Officer inviting the bid / Engineer-in-Charge will clarify queries on the Contract Data on requisition by the intending Bidder. The bidder may ask question in the e-procurement portal using his DSC; provided the questions are raised before the date mentioned in the home page under critical dates.

1.7. The bids uploaded by the Tender Inviting Officer may consist of general arrangements drawings or typical sections of the project. Bidder may down load these drawings and take out the

print for detail study. Any other drawings and documents pertaining to the works available with the officer inviting the Bid as well as in the office of the Superintending Engineer and Superintending Engineer as mentioned in the Contract Data will be open for inspection by the bidders. The bidder is required to down load all the documents including the drawings for preparation of his bid. It is not necessary for the part of the Bidder to up-load the drawings other Bid documents (after signing) while up-loading his bid. He is required to up load documents related to his eligibility criteria and qualification information and Bill of Quantities duly filled in. It is assumed that while participating in the bid, the bidder has referred all the drawings and documents uploaded by the Officer Inviting the Bid. Seeking any revision of rates or backing out of the bid claiming for not having referred to any or all documents provided in the Bid by the Officer Inviting the Bid will be construed as plea to disrupt the bidding process and in such cases the bid security shall be forfeited.

1.8. Any addendum issued shall be part of the bidding documents and shall be notified in the website www.tendersorissa.gov.in / notice board and through paper publication.

1.8.1. All the volumes/documents shall be provided in the portal by the Officer inviting the bid. The bidder shall carefully go through the document and prepare the required documents and up load the scanned documents in Portable Document Format to the portal in the designated locations of Technical Bid. He will fill up the rates of items or

percentage in the BOQ down loaded for the work in designated Cell and up loads the same in designated locations of Financial Bid. Submission of document shall be effected by using DSC of appropriate class.

2.BID SECURITY: To be deposited online., instruction to be followed for online payment available in the eProcurement portal during processing of tender by bidder

3. FORMAT AND SIGNING OF BID: The bidder can download the tender of his choice and save it in his system and undertake the necessary preparatory work off-line and upload the completed tender at his convenience within the final date and time of submission. The bidder shall only submit single copy of the required documents and Price Bid in the portal. In the Financial bid, the bidder cannot leave any figure blank. He has to only write the figures, the words will be self generated. The Bidders are advised to up load the completed Bid document well ahead of the last date & time of receipt to avoid any last moment problem of power failures etc.

3.1. The Bidder shall go through the Bid carefully and list the documents those are asked for submission. He shall prepare all documents including cost of Bid Document, Bid Security, Declaration form, price bid etc and store in the system.

3.2. The bidder shall log on to the portal with his DSC and move to the desired tender for up loading the documents in appropriate place one by one simultaneously checking the documents. Once the Bidder makes sure that all the documents have been up-loaded in appropriate place he clicks the submit button to submit the bid to the portal.

3.2.1. The bids once submitted cannot be retrieved or corrected. Tender cannot be pre-opened and cannot be submitted after due date and time. Therefore only after satisfying that all the documents have been uploaded, the Bidder should activate submit button.

3.2.2. In the e-procurement process each processes are time stamped. The system can identify each individual who has entered in to the portal for any bid and the time of entering in to the portal.

3.2.3. The Bidder should ensure clarity of the document up loaded by him to the portal especially the scanned documents by taking out sample printing. Non-submission of legible documents may render the bid non-responsive. However, the Officer inviting the Bid if so desires can ask for legible copies or original copies for verification with in a

stipulated period provided such document in no way alters the Bidder's price bid. If the Bidder fails to submit the original documents with in the stipulated date, his bid security shall be forfeited.

3.2.2.In the e-procurement process each processes are time stamped. The system can identify each individual who has entered in to the portal for any bid and the time of entering in to the portal.

3.2.3. The Bidder should ensure clarity of the document up loaded by him to the portal especially the scanned documents by taking out sample printing. Non-submission of legible documents may render the bid non-responsive. However, the Officer inviting the Bid if so desires can ask for legible copies or original copies for verification within a stipulated period provided such document in no way alters the bidder's price bid. If the Bidder fails to submit the original documents within the stipulated date, his bid security shall be forfeited.

4. SECURITY OF BID SUBMISSION:

4.1. All bid data uploaded by the Bidder to the portal will be encrypted by the DSC of the opener(s). The system shall require all the mandatory forms and fields filled up by the contractor during the process of submission of the bid/tender.

4.2. The Bid shall be received in encrypted format by the system which can only be decrypted / opened by the authorized openers only on or after the due date and time.

5. DEADLINE FOR SUBMISSION OF THE BIDS:

5.1. The online bidding will remain active till the last date and time of the bid submission. Once the date and time (Server date and time) is over, the bidder will not be able to submit the bid. The date & time of bid submission shall remain unaltered even if the specified date for the submission of bids declared as a holiday for the Officer inviting the Bid.

5.2. Bidders are to submit only the Original BOQ uploaded by publisher after entering the relevant fields without any alteration/deletion/modification. Multiple BOQ submission shall lead to cancellation of bid.

5.3. In case of item rate bidders shall fill in their rates other than zero value in the specified cells. In Item Rate tender the quoted zero value is valid and will be taken as schedule of rates.

6. LATE BIDS:

6.1. The system shall reject submission of any bid through portal after closure of the receipt time. For all purpose the server time displayed in the e-procurement portal shall be the time to be followed by the bidder and concerned officers.

7. MODIFICATION AND WITHDRAWAL OF BIDS:

7.1. In the E-Procurement Portal, it is allowed to modify the bid any number of times before the final date and time of submission. The bidder shall have to log on to the system and resubmit the documents as asked for by the system including the price bid. In doing so, the bids already submitted by the bidder will be removed automatically from the system and the latest bid only will be admitted. But the bidder should avoid modification of bid at the last moment to avoid system failure or malfunction of internet or traffic jam or power failure. If the bidder fails to submit his modified bids within the designated time of receipt, the bid already in the system shall be taken for evaluation.

7.2. In the E-Procurement Portal, withdrawal of bid is allowed. But in such case he has to write a letter with appropriate reasons for his withdrawal addressed to the Officer inviting the bid and upload the scanned document to portal in the respective bid before the closure date and time of receipt of the bid. The system shall not allow any withdrawal after expiry of the closure time of the bid.

8. OPENING OF THE BID:

8.1. Bid opening date is specified during tender creation or can be extended with corrigendum. This date is available in IFB, tender document as well as the home page of portal. Bid opening can be done by the authorized users which are defined during the tender publication / approval stage. The bids are encrypted using their public keys and can be decrypted only on or after the Bid Opening due date and time. The bid openers private key will be required to open the bids and all the openers have to log on to the portal during that time.

8.1.1. The bidders who participated in the online bidding can witness opening of the bid from any system logging on to the portal with the DSC away from opening place. Contractors are not required to be present during the bid opening at the opening location if they so desire.

8.1.2. Each activity is date and time stamped with **user** details. For time stamping, server time is taken as the reference.

8.2. In the event of the specified date of bid opening being declared a holiday for the Officer inviting the Bid/Engineer-in-Charge, the bids will be opened at the appointed time on the next working day.

8.3. In case bids are invited for more than one package, the order for opening of the "Bid" shall be that in which they appear in the "Invitation for Bid". 8.4. During bid opening, the covers containing original financial instruments towards Cost of bid and Bid Security in the form specified in the DTCN, received after last date of receipt of bid and before opening of the bids shall be opened and declared.

8.4.1. Combined bid security for more than one work is not acceptable.

8.5. The Bid openers; who have been pre-defined shall log on to the portal with their respective DSC. Unless all the Officers who have been declared as Opening officers, log on the portal with their DSC the Tender cannot be opened.

8.5.1. The Opening Officers will systematically check the scanned document submitted. If found in order, they will continue opening of all other documents in the system provided under Technical Bid.

8.5.2. Subject to confirmation of the bid security by the issuing institutions, the bids accompanied with appropriate bid cost and valid bid security will be taken up for evaluation with respect to the qualification Information and other information furnished.

8.5.3. After receipt of confirmation of the bid security, the bidder may be asked in writing to clarify to the documents in the Technical Bid, if necessary, with respect to any doubts or illegible documents required for Technical Evaluation.

8.5.4. The bidders will respond in not more than 7 days of issue of the clarification letter, failing which the bid of the bidder will be evaluated on its own merit

8.5.5. Immediately, on receipt of these clarifications, the Evaluating Officers; predefined in the system for the bid, will finalize the list of responsive bidders. They will log on to the site with their DSC and record their comments on the Technical evaluation page in the system. The Officer Inviting the Bid if also the accepting authority, shall log on to the system with his digital signature and check the technical evaluation. He can either accept or pass on to the evaluating officers for re-evaluation. Upon acceptance of technical evaluation by the Accepting authority in the system, the system shall automatically generate letter to all the responsive bidders and the system shall forward the letter to all the responsive bidder that their technical bid has been evaluated responsive with respect to the data/information furnished by him and the letter shall also intimate him the date & time of opening of financial bid. The system shall also inform the non-responsive bidders in their e-mail ID that their bid has been found non-responsive.

8.6. The Technical evaluation of all the bids will be taken up as per the information furnished by the Bidders. But evaluation of the bid does not exonerate the bidders from checking their original documents and if at a later date the bidder is found to have misled the evaluation through wrong information, action as per relevant clause of DTCN shall be taken against the bidder/contractor.

8.7. After **technical** evaluation of the bidders and selection of the qualified bidders, the financial bids of the technically qualified bidders shall be opened on the due date of opening. Members of the bid opening committee log on to the system in sequence and open the financial bids for the technically qualified bidders. The opening of financial bid by the opening officer using their DSC shall decrypt the financial bids.

8.7.1. Opening of price bid and evaluation of lowest bidder is subject to satisfaction of other qualification information.

8.7.2. The Financial Bid will be opened on the notified date & time in the presence of bidders or their authorized representative who wish to be present.

8.7.3. At the time of opening of "Financial Bid", the names of the bidders whose technical bids were found responsive will be announced and the bids of only those bidders will be opened. The remaining bids will be rejected.

8.7.4. The responsive bidders' name, the bid prices, the item wise rates the total amount of each item, any discounts and withdrawals, and such other details as the officer inviting the tender may consider appropriate, will be announced by him or his authorized representatives at the time of opening.

8.7.5. Rebate/discount offer if any uploaded to the system shall be declared and recorded first.

8.7.6. The Financial bid of the bidders shall be opened one by one by the designated officers. The system shall auto-generate the Comparative statement.

8.7.7. The Bidder can witness the principal activities and view the documents/summary reports for that particular work by logging on to the portal with his DSC from anywhere.

9. CLARIFICATION OF BIDS:

9.1. For examination, evaluation, and comparison of bids, the officer inviting the bid may, at his discretion, ask lowest bidder for clarification of his rates including reduction of rate on negotiation and breakdowns of unit rates.

9.2. On opening of the price bid the system shall arrange the financial bids in order of their value (L1 first, followed by L2, L3) for subsequent evaluation. The evaluation status (Sheet) will be visible to all the participating bidders after opening on their respective logins. Each activity is recorded in the system with date and time stamping.

10. NOTIFICATION OF AWARD AND SIGNING OF AGREEMENT:

1.1. 10.1. In the E-Procurement Portal, the system shall generate the template of award letter and the Officer Inviting the Bid shall mention the amount of Performance Security and additional security required to be furnished in the letter and intimate the bidders in his e-mail ID. The issue of the letter of acceptance shall be treated as closure of the Bid process and commencement of the contract.

INFORMATION AND INSTRUCTION TO BIDDERS

1. General

Forms for bid and letter of Transmittal are attached herewith. All information required, for the enclosed forms should be furnished. If any particulars query is not relevant it should be stated as 'Not applicable'. However, the tenderers are cautioned that giving incomplete information in the tender or making any change in the prescribed forms may render the tender non-responsive.

- 8.3 If the intending tenderer is a firm in partnership it shall be digitally signed by a partner holding the power of attorney for the firm in partnership in which case a scanned copy of power of attorney shall accompany in the technical bid documents while uploading the tender through the "e" Procurement.
- 8.4 If the intending tenderer is a limited company or Corporation, it shall be digitally signed by a duly authorized person holding the power of attorney in which case scanned copy of power of attorney shall accompany while uploading the tender through the "e" Procurement.
- 8.5 All witness and sureties shall be of person of status and probity and their full names, occupation and address shall be stated below their signatures.

9. Final Decision making authority

The original records are to be verified before the officer inviting tender before the date and time of opening of the bid. if the documents are found to be genuine after due check. If any discrepancy found on genuineness' of the records furnished during verification, legal prosecution will be initiated against the default bidder as per legal provisions and the bidder will be debarred from tendering any further work in the Department. The competent authority reserves the right to accept or reject or disqualify any of the tender without assigning any reasons and its decision shall be final.

10. Further Clarification

The Superintending Engineer, **Minor Irrigation Division GanjamNo-II, Berhampur** may be contacted during office hours on any working (as per date and time mentioned in DTCN) .

The bidders desirous to participate in "on-line" bidding must possess compatible Digital Signature Certificate of Class II or Class III. The web site for on-line bidding is <http://tendersorissa.gov.in>.

11. (a) The plans, specification and scope for the work can be seen in the office of the Superintending Engineer. Minor Irrigation Division, Ganjam No.-II. Berhampur during office hour in all working days (as per date and time mentioned in DTCN).
- (b) The tender will be valid for 90 days from the date of its opening.
12. Each tender must quote percentage rate.
13. The authority reserves the right to reject any or all the tenders without assigning any reason there to.
 - a. All rates should be for finished items of work unless or otherwise mentioned in the tender schedule.
14. All taxes, fees, royalties etc. payable under the local rule, Income Taxes, Octrai Tax etc excluding GST. will be paid by the contractor and these must be included in the rates quoted. No extra payment will be made during the period of contract for any enhancement of taxes, tollage or royalty etc, as affected by the Union Govt. or State Govt. or any other authority.
15. The contractor should abide by fair wages clauses introduced by the Govt. and will not pay less than the fair wages fixed by Govt. to the labourers engaged by him for the work.
16. The tender will be summarily rejected unless the tenderer encloses the certified copy of the (PAN) and State Sales Tax clearance certificate (VAT) along with the tender. The original certificate shall have to be produced (if required) at the time of opening. The copies of I.T.C.C. (PAN) and S.T.C.C. (VAT) /GST Regd. Certificate given with other tender papers previously or with other tender on the same day will not be taken into consideration.

17. The percentage as per the tender schedule should be written both in figures and words and in the event of any discrepancy written in word shall prevail,
18. Items of work not covered by the tender schedule shall be paid at the current Schedule of Rates of the State and those not covered by the said Schedule of Rates will be paid on actual analysis approved by competent authority as accommodates for in clause-10 of P1 contract.
19. The contractor shall be liable to provide full indemnity to the department for the payment of any compensation under the workman compensation Act VIII of 1923 on account of workman employed by the contractor and the full amount of such compensation payable will be recovered from the contractor.
20. The authority reserves the right to make any increase or decrease in the quantities of items of works mentioned in the schedule attached to the tender notice as may be considered necessary for the satisfactory completion of the contract work. All such increase or decrease shall in no way invalidate the contract rates .The contractor shall not be entitled for any compensation on this account except extension of time when considered necessary.
21. The tenderer whose tender is accepted shall forthwith upon intimation given to him in writing on acceptance of his tender is to make an initial security deposit of 2% including E.M.D. within fifteen days of such intimation and sign the agreement in P.W.D form No. P1 for the due fulfillment of other contract in the office of the Superintending Engineer, Minor Irrigation Division Gamjam-II, Berhampur.
- The security deposit shall be treated as an initial security deposit against fulfillment of the contract. The earnest money deposited at the time of the tender is liable for forfeiture incase of failure by the successful contractor to deposit the security within schedule time for entering into the agreement .The security deposit together with earnest money should be taken as security deposit for fulfillment of the contract.
22. The earnest money of the unsuccessful tenders will be refunded on application as per rules applicable.
23. That for the purpose of jurisdiction in the event of any dispute if any, the contract should be deemed to have been entered in to with in the state of Orissa and it is agreed that either party to the contract or the agreement will have the right to bring a suit in regard to the matter covered by this agreement or contract at any place out side Orissa.
24. The work may be split up and distributed among several contractors if considered necessary on the emergent circumstances of the work and the contractor is not entitled to any compensation on this account.
25. No compensation will be paid by the Deptt. for any damage done by rain. Flood, Cyclone or by any other natural calamities, labourers made idle, labour strike, public agitation or riot and so the rates of the contractor should include all such contingency during the execution of work.
26. Every tenderer is deemed to have visited the site of the work and quarry before tendering and should have made himself thoroughly satisfied with the quantity and quality of the materials available. No extra lead will be admissible for any material. The rates shall be 'inclusive of all leads, lifts, conveyance charges, royalty and all other taxes including local taxes of all materials. It should be understood clearly that no claim whatsoever, would be entertained afterwards on the plea of non-availability of proper quantity, quality of materials, or any other ground.
27. The contractor shall have to furnish a certificate along with the tender to the effect that he is not related to any officer of the department of the rank of the Asst. Engineer or above or any officer of the rank of Asst. Secretary or above of the department.
28. Conditional tender shall not be entertained.
29. Tenderers are required to go through each clause of P.W.D form No.P1 carefully in addition to the clauses mentioned here in before tendering the work. While submitting the tender, the tenderer should sign in each page of tender documents.
(Note :- Arbitration Clause-22 of P.W.D. Form No.P1 has been deleted as per works Department No.29449, dt.24.12.81.)
30. The condition in this detailed call notice will form part of agreement to be drawn by the contractor.
31. On no account, the contract work should be sublet to any body without the prior approval of the competent authority of the Department and in such an event, the contractor may be penalized under appropriate clause of P1 contract.
32. The contractor shall provide at his own cost housing accommodation, water supply arrangement, sanitary arrangement, fuel, provision and medical aid to the labourers engaged for the work.
33. The work is to be carried out in accordance with the Orissa Detailed Standard Specification and Technical Specification as directed by Engineer-in-Charge.
34. As regards extra items of work besides the agreement items or extra quantity of any items besides the scheduled quantity, written order must be obtained from the competent authority before commencement of that additional work..

35. The contractor shall sign as a token of final acceptance on the plans, sections and agreements for the work prior to taking up the work for execution.
36. The contractor is to supply necessary labour and materials for the purpose of layout whenever required at his own cost.
37. a) The materials, if available in the store of the Department, will be supplied to the contractor for use in the work and the contractor shall use such materials without any controversy or dispute on this account .The rates of issue of such materials will be as per the materials statement attached in P.W.D.P1 form.
b) The contractor shall make arrangement at his own cost at the work site for proper storage and safe custody of the materials made over to him/them. The Engineer-in-Charge has right to refuse to issue materials unless he satisfies regarding storing arrangements made by contractor at work site.
c) Steel bars of only manufacturing companies such as SAIL are to be used in major structures like bridges, multi-stored building and water retaining structures. But rerolling steel bars should not be used in any work.
d) The cement of the companies having their own manufacturing units in the State of Orissa, are to be used in all works.
(i) Royalty for stone product @ Rs.(Rupees) only per cum and for sand & moorum @ Rs. Rs.(Rupees) only per cum is to be recovered from the bill of the contractor.
(ii) Empty gunny bag @ Rs.(Rupees) only per bag is to be recovered from the bill of the contractor.
38. a) After the work is finished all surplus materials and debris should be removed by the contractor from the site to a safe distance as may be directed by the Engineer-in-Charge without any extra payment.
b) The contractor will construct and maintain roads to quarries, borrow areas, approach road within the project site and to individual structure as is necessary for transport of materials and inspection of work at his own cost.
c) Water required for cleaning either materials or surface for work and curing for cement works etc. will be arranged by the contractor at his own cost and carriage cost of water, sinking of well shall not be paid at any account. This is treated as inclusive in his item rates.
39. Letters found in the tender box intimating modification to the tenders already submitted will not be considered.
40. The tender, which is not in the prescribed proforma and is not strictly according to the terms and conditions of the tender notice and specification, is liable for rejection.
41. All preliminary work such as vats, mixing platform etc. are to be done by the contractor at his own cost and shall be dismantled and removed from the site of work at his own cost after their utility period.
42. The contractor should at his own cost arrange necessary tools and plants required for the work at his own cost. The running charges of such plant and cost of consumables are to be borne by the contractor.
43. Under no circumstances, interest is chargeable for the dues or any additional dues,(if any) payable for the work shall be entertained.
44. It shall be distinctly understood that it is entirely the responsibility of the contractor to make such arrangement, as may be required from time to time to protect the men, machinery materials, and the work under progress and work for which the measurements were recorded and payment made against damages either during working season or during the rainy season. The department accepts no liability, whatsoever for any damages or loss of men, materials, machinery and work or any hindrance caused to the progress of work.
45. Dewatering of any magnitude either for excavation of foundation to finished section and laying concrete or masonry work or any structure when and wherever necessary during the execution period will have to be done by the contractor at his own cost. This is treated to be inclusive of his tendered rate.
46. The contractor should keep himself in constant touch with the Engineer-in-charge for smooth execution of work and arrange for adequate labourer depending on the workload and working place available. No claim for idle labour on any account will be entertained.
47. No extension of time shall be allowed to the contractor. However, it may be considered in case of unavoidable reasons. The extension of time may be allowed if authority feels necessary.
- ..
48. After completion of the work the contractor shall arrange at his own cost all requisite equipments and labour for testing the work and bear the entire cost of such test.
49. The contractor should install a Laboratory with provision of equipments and personnel at the project site to conduct the required field level tests during the progress of the work.

50. To guard the adherence of time stipulation, the contractor will have to furnish the detail work programme showing there in the periodical progressive attainment with detail of skill unskilled labourer and the T & P to be deployed in the work.
51. The Department will provide no Electric supply. The contractor has to make his own arrangements with Electrical authority for taking necessary connection to his work site, colonies etc. by fixing meters and make payment to Electrical authority as per the prevailing Tariff of power consumed.
52. All correspondences with the tenderer will be made through post in the address given in the tender. The tenderer must mention in the tender, his correct postal address where letters can be delivered to him. The department will not be held responsible for non-receipt of any letter by the tenderer either for wrong address given by him or for his absence from the given address.
53. Construction of coffer dams required for diversion of flow of nalla for execution of work, excavation of channel and approach channel should be included in the rates. The channels should be filled up and the cofferdam should be dismantled when required as per instruction of E.I.C. for which no extra payment is to be made.
54. All the intending tenderers shall furnish the following information in the proforma given below along with the tender.
- a) Particulars of each work completed as prime contractor for last three years with details of Agreement No., Amount, Name of Division, date of commencement and completion duly supported with completion certificate from an officer not below the rank of Superintending Engineer of. State Government.
 - b) List of T & P, vehicles machineries available with him.

ORISSA PUBLIC WORKS DEPARTMENT (FORM P1)
Percentage Rate Tender and Contract for works

General Rules and Directions for the Guidance of Contractor.

1. All works proposed for execution by contract will be notified in a form of invitation to tender pasted on a board hung up in the office and signed by the Sub-divisional Officer / Superintending Engineer.

This notice will state the work to be carried out, the items and approximate quantities thereof as well as the date for submitting and opening tenders also the amount of earnest money to be deposited and the amount of the security deposit to be deposited by the successful tenderer and the percentage if any, to be deducted from bills. Copies of the specification, designs, and drawings and any other documents required in connection with the submission of tender signed for the purpose of identification by the Sub-divisional Officer / Superintending Engineer shall also be open for inspection by the contractor at the office of the Sub-divisional Officer/ Superintending Engineer during office hours.

2. In the event of the tender being submitted by a firm it must be signed separately by each member thereof, or in the event of the absence of any partner, it must be signed on his behalf by a person holding a power of attorney authorizing him to do so.

3. Receipts for payments made on account of work, when executed by a firm, must also be signed by the several partners, except where the contractors are described in their tender as a firm in which case the receipt must be signed in the name of the firm by one of the partners, or by some other person having authority to give effectual receipts for the firm.

4. The memorandum of work tendered for and the memorandum of materials to be supplied by the Public Works Department and their issue rates shall be filled in and completed in the office of the Sub-divisional Officer/ Superintending Engineer before the tender form is issued if a form is issued to an intending tendered without having been so filled in a completed he shall request the office to have this done before he completes and delivers his tender.

5. Any person who submits a tender shall fill up the usual printed form stating at what percentage rate he is willing to undertake of the work. Incomplete tender and tenders which propose any alteration in the work specified in the said form of invitation to tender, or which contain any other conditions of any sort, or omit to note the time within which the work can be furnished or which are not accompanied by a treasury challan for the required earnest money will be liable to rejection. No single tender shall include more than one work. But contractors who wish to tender for two or more work shall submit a separate tender for each. Tender shall bear the name of the work to which they refer written outside the envelope. Cash deposits for earnest money herein before mentioned shall be made in Govt. treasuries and the challan thereof should be enclosed with the tender.

6. The Engineer or his duly authorized assistant will open the tenders in the presence of any intending contractors who may be present at the time and will enter the amounts of the several tenders in a comparative statement in a suitable form. In the event of a tender being rejected, the challan for the earnest money forwarded therewith shall there upon be returned to the tenderer with a pay order for the amount of the earnest money.

7. The Engineer shall have the right of rejecting all or any of the tenders.

8. In the event of a tender being selected for acceptance the Engineer who opened the tenders will, if he is competent to accept the tender, inform the tenderer of the selected tender who shall there upon sign copies of the specification and other document mentioned in rules 1 and 4 for the purpose of identification and for his acceptance with tender. The tenderer of the selected tender shall also deposit the required amount of the security money within the prescribed time. If the tenderer fails to deposit the required amount of the security money within the prescribed time, the Engineer may reject the tender.

If the Engineer is not competent to accept the tender himself, he will inform the tenderer of the tender which he decides to recommend for acceptance. Such tenderer shall there upon sign forthwith copies of the specification and other documents mentioned in rules 1 to 4 shall deposit the required amount of the security money within the prescribed time, the tender with the specification and other documents signed by the tenderer will then be forwarded for acceptance to the Engineer competent to accept the same in case he rejects the tender the security money deposited shall be refunded to tenderer.

9. When a tender is selected for acceptance the tenderer shall deposit the required amount of the security money in cash in the treasury and shall forward the challan to the Superintending Engineer

Govt. securities may be endorsed to the Superintending Engineer in lieu of a cash deposit of the required amount of the security money. No tender shall be finally accepted until the required amount of the security money has been deposited.

10. The amount of security money to be deposited by the tenderer whose tender is selected for acceptance shall be **2** percent of the aggregate value of the work and towards this amount, the earnest money already deposited by him shall be credited. At least half this security inclusive of the earnest money shall be deposited by the tenderer within such time as may be notified to him in writing by the office inviting the tender, failing which tender shall be liable to rejection.

Any balance of the Security money outstanding after completion of the contract with the tenderer may be made up by deductions of 5 percent of the amount of each payment to be made to him under clause 6 of the conditions of contract for the work done under the contract.

11. When tender has been selected for acceptance and the required amount of the security money has been deposited the Engineer shall scrutinize all pages of the form of item, rate, tender and contract for works to see that the form has been properly filled up and signed by the contractor and the signature witnessed. He shall then, if he is competent to accept the tender, sign the acceptance of the tender or if he is not so competent, shall send the form for signature of the acceptance to the officer competent to accept it.

12. (i) A separate and specific bank account may be opened to keep the security deposits deducted from the running bills in any Nationalized Bank only in the name of the concerned Superintending Engineer of the Division/ FA & CAO, but not in personal name.

(ii) The security amount so deposited should be withdrawn from the same account after completion of the defect liability period of the concerned work and after the work is found defect free in all respects.

In the event of the specified date of Bid opening being declared a holiday the Bid will be opened at the appointed time & location on the next working day.	In case of submission of Bids through the E-Procurement Portal, the bidders who participated in the online bidding can witness opening of the bid from any system logging on to the portal away from opening place. The bids can only be opened by the pre-designated officials only after the opening time mentioned in the bid.
Award of work	
The tenderer whose tender is selected for acceptance shall within a period of seven days upon intimation being given to him of acceptance of his tender make an initial security deposit in the form specified including the amount already deposited as earnest money which shall be 2% of the value of the accepted tendered amount and sign agreement in the P.W.D. form No. P1 (Schedule XLV No.61) for the fulfillment of the contract in the office of the Superintending Engineer, Minor Irrigation Division Ganjam No-II, Berhampur.	In case of submission of Bids through the E-Procurement Portal, the system shall generate the award of Contract letter and intimate the bidders in his e-mail

(B)- Amendment to Para-3.5.5 (V) Note-III of OPWD Code, Vol-I by inclusion -

Note-III- For availing incentive clause in any project which is completed before the stipulated date of completion, subject to other stipulations it is mandatory on the part of the concerned Executive Engineer to report the actual date of completion of the project as soon as possible through fax or e-mail so that the report is received within 7 days of such completion by the concerned SE,CE & the Administrative Department. The Incentive for timely completion should be on a graduated scale of one percent to 10 percent of the contract value. Assessment of incentives may be worked out for earlier completion of work-in all respect in the following scale

Before 30% of contract period =10% of Contract Value

Before 20 to30% of contract period=7.5% of Contract Value

Before 10 to 20% of contract period=5% of Contract Value

Before 5 to 10% of contract period=2.5% of Contract Value

Before 5% of contract period=1% of Contract Value

Annexure- V

5) Amendment to Para-3.2.8 Note-II of OPWD Code, Vol-I by inclusion

Note-II- In case of tender accepted below schedule of rate , the tender amount excluding centages shall be treated as sanctioned amount and allotment will be limited to that extent .Any deviation in scope of work affecting the agreement amount in such an agreement will be governed by the relevant provisions of OPWD Code.

Sabu

CONDITIONS OF CONTRACT

Clause-1. All compensation or other sums of money payable to the Govt. by the contractor under the terms of his contract may be deducted from or paid by the sale of a sufficient part of his security deposit or from the interest arising there from, or from any sums which may be due or may become due to the contractor on any account whatsoever and in the event of his security deposit being reduced by reason of any such deduction or sale as aforesaid, the contractor shall within ten days thereafter make good in cash or Government securities endorsed as aforesaid any sum or sums which may have been deducted from or raised by sale of the security deposit or any part thereof.

Clause 2(a). The time allowed for carrying out the work as entered in the tender shall be strictly observed by the contractor and shall be reckoned from the date on which the written order to commence the work is given to the contractor. The work shall throughout the stipulated period of the contract, be carried on with all due diligence (time being deemed to be of essence of the contract on the part of the contractor) and the contractor shall pay, as compensation, an amount equal to half percent on the amount of the estimated cost, if the whole work as shown by the tender for everyday that the work remains uncommenced, or unfinished after the proper dates (The work should not be considered finished until such date as the Superintending Engineer shall certify as the date on which the work is finished after necessary rectification of defects as pointed out by the Superintending Engineer or his authorised agents, are fully complied with by the contractor to the Superintending Engineer's satisfaction). And further, to ensure good progress during the execution of the work, the contractor shall be bound, in all cases in which the time allowed for any work exceeds one month, to complete one fourth of the whole of the work before one fourth of the whole time allowed under the contract has elapsed, one half of the work, before one half of such time has elapsed and three fourth of work before three fourth of such time has elapsed, in the events of the contractor failing to comply with the conditions, he shall be liable to pay as compensation an amount equal to one -third percent on the said estimated cost of the whole work for everyday that the due quantity of work remains incomplete. Provided always that the entire amount of compensation to be paid under the provisions of this clause shall not exceed 10 percent of the estimated cost of the work as shown in the tender.

(b) If there are possibilities of exceeding this compensation amount as mentioned in clause (a) 10% of the estimated cost or in any case in which under any clause or clauses of this contract the contractor shall have rendered himself liable to pay compensation amounting to the whole of his security deposit in the hands of Government (whether paid in full at a time or deducted by installments) the Superintending Engineer on behalf of the Governor of Orissa, shall have power to adopt any of the following courses, as he may deem best suited to the interest of the Government.

i) To rescind the contract (of which rescission notice in the writing to the contractor under the hands of the Superintending Engineer shall be conclusive evidence) 20% of the value of the left over work will be realized from the contractor as penalty.

In the event of any of the above courses being adopted by the Superintending Engineer the contractor shall have no claim to compensation for any loss sustained by him by reason of his having purchased or procured any materials or entered any engagements or made any advance on account of or with a view to the execution of work or performance of contract. And in case the contract shall be rescinded under the provision aforesaid, the contractor shall not be entitled to recover or be paid any sum for any work actually performed under this contract, unless and until the Superintending Engineer shall have certified in writing the performance of such work and the value payable in respect thereof and he shall only be entitled to be paid the value of so certified.

ii) Security deposit of the contractor shall be refunded only six months after date of completion of the work provided the final bill has been paid and defects if any rectified.

Clause-3. In any case in which any of the powers conferred upon the Superintending Engineer by clause 3 here of, shall have become exercisable and the same shall not be exercised, the non exercise thereof shall not constitute a waiver of any of the conditions here of and such powers shall not notwithstanding be exercisable in the event of any future case of default by the contractor of which by any clause or clauses hereof, he is declared liable to pay compensation amounting to the whole of his security deposit, and the liability of the contractor for past and future compensation shall remain unaffected. In the event of the Superintending Engineer putting in force the powers vested in him under the preceding clause may be, if he so desires , take possession of all or any tools plants, materials and stores, in or upon the works, or the site thereof or belonging to the contractor, or procured by him and intended to be used for the execution of the work or any part thereof, paying or allowing for the same in the account at the contract rates or in case of these not being applicable, at current market rates to be certified by the Superintending Engineer whose certificate thereof shall be final, otherwise the Superintending Engineer may send a notice in writing to the contractor or his clerk of the works, foreman or other authorised agent required him to remove such tools, plants, materials, or stores from the premises(with in a time to be specified in such notice) and in the event of the contractor failing to comply with any such requisition , the Superintending Engineer may remove them at the contractor's expense or sell them by auction or private sale on account of the contractor and at his risk in all respects and the certificate of the Superintending Engineer as to the expense of any such removal and the amount of the proceeds and expense of any such sale shall be final and conclusive against the contractor.

The contractor remains liable to pay compensation if action not taken under clause - 5

Power to take possession of or require removal of or Sell contractor's plants.

Clause-4. If the contractor shall desire an extension of the time for completion of the work on the ground of his having been unavoidably hindered in its execution or any other ground he shall apply in writing to the Superintending Engineer within 30 days of the date of the hindrance on account of which he desires such extension as aforesaid and the Superintending Engineer shall if he feels that the grounds shown is reasonable may authorise such extension of time as may in his opinion be necessary or proper. The Superintending Engineer shall at the same time inform the contractor on the claims for compensation, if any, for delay

Extension of time

Clause-5. On completion of the work, the contractor shall be furnished with a certificate by the Superintending Engineer (hereinafter called the Engineer-in- charge) of such completion, but no such certificate be given nor shall the work be considered to be completed until the contractor shall have removed from the area of the premises (to be distinctly marked by the Superintending Engineer in the site plan) on which the work shall be executed, all scaffolding surplus materials and rubbish, and cleared off the dirt from wood work, doors, windows, walls , floors or other parts of any building in upon or about which the work is to be executed or of which he may have possession for the purpose of the execution thereof nor until the work shall have been measured by the officer of the public works department in accordance with the rules of the department whose

measurement shall be binding and conclusive against the contractors. If the contractor shall fail to comply with the requirements of this clause as to removal of scaffolding surplus materials and rubbish and cleaning off dirt on or before the date fixed for the completion of the work ,the Engineer in Charge may at the expense of the contractor remove such scaffolding materials and rubbish and dispose of the same as he thinks fit and clean off such dirt as aforesaid and the contractor shall forthwith pay the amount of all expenses incurred and shall have no claim **in** respect of any such scaffolding or surplus materials as aforesaid except for any sum actually realised by the sale thereof.

Sub-clause to clause-5. If in the opinion of the Engineer-in-charge which shall be final and binding on the contractor occupation or utilisation of a portion of the work completed in no way interferes with the progress of rest of the work, the same may be occupied or utilized by or on behalf of the Government under the written order of the Engineer -in -Charge. This will not impede the right of the Engineer-in-Charge to get the defects, if any, rectified by the contractor at his (Contractors) own cost within six months from the date of completion of the whole work, provided that the contractor will not be allowed any other compensation in the shape of extension of stipulated period or any other monetary compensation on account of such occupation or use.

Final
Certificate

Clause-6 A bill shall be submitted by the contractor each month on or before the date fixed by the Engineer -in-Charge for all works executed in the previous month and the Engineer-in-Charge or his subordinate shall take the requisite measurement for the purpose of having the same verified and the claim as far as admissible, adjusted, if possible, before the expiry of Ten days from the presentation of the bill. If the contractor does not submit the bill within the time fixed as aforesaid, the Engineer -in-Charge or his subordinates shall measure up the said work in the presence of the contractor whose countersignature to the measurement list will be sufficient warrant, and the Engineer-in-charge or his subordinate shall prepare a bill from such list which shall be binding on the contractor in all respects.

Payment on
intermediate
certificate to be
regarded as
advance and bill
to be submitted
monthly

Provided that if any balance of the 10% security is outstanding from each such payment shall be deducted so much not exceeding 5% as may be necessary to make up the balance of the security. All such intermediate payments to the contractor shall be regarded as payments by way of advance against the final payment only and not as payments for works actually done and completed and shall not preclude the requiring of bad unsound and imperfect or unskill full work to be removed and taken away and reconstructed or re-erected or any part thereof in any respect or accrual of any claim nor shall it conclude, determine or effect in any way the powers of Engineer-in-Charge under these conditions or any of them as to the final settlement or adjustment of the accounts or otherwise, or in other way vary or affect the contract.

Clause-7 The final bill shall be prepared by the officers of the Public Works Department in accordance with the rules of the department in the presence of the contractor within one month of the date fixed for completion of the work.

Clause-8 If the specification or estimate of the work provides for the use of any special description of materials to be supplied from the Engineer-in-Charge's store, or it is required that the contractor shall use certain stores to be provided by the Engineer-in-charge under the conditions of this contract (such materials and stores, and the price to be charged therefore as hereinafter mentioned being so far as practicable for the convenience of the contractor, but not so as, in any way, to control the meaning or effect of this contract are specified in the schedule or memorandum hereto annexed) the contractor shall be supplied with such materials and stores noted in the annexed schedule as are required from time to time to be used by him for the purpose of the contract only, and the value of the full quantity of materials and stores so supplied at the rates specified in the said schedule may be set off or deducted from any sums then, due or thereafter to become due to the contractor under the contract or otherwise, or against or from the security deposit, or the proceeds of sale thereof if the same is held in Government securities the same or a sufficient portion thereof being in this case sold for the purpose. All materials supplied to the contractor shall remain the absolute property of Government and shall not on any account be removed from the site of the work and shall at all times be open to inspection by the Engineer-in-charge. Any such materials unused and in perfectly good condition at the time of the completion or determination of the contract shall be returned to the Engineer-in-Charge's store, at the prevailing market rate or at the issue rate whichever is less if by a notice in writing under his hand he shall so require, but the contractor shall not be entitled to return any such materials unless with such consent, and shall have no claim for compensation on account of any such materials so supplied to him as aforesaid being unused by him, or for any wastage in or damage to any such materials.

Stores
supplied by
government

Clause-8 (a): If a contractor removes any material or stock so supplied to him from the site of the work in contravention of the provision of this clause with a view to dispose off the same dishonestly, he shall, in addition to any other liability, civil or criminal arising out of this contract be liable to pay a penalty equivalent to five times the price of the said materials or stock, according to the stipulated rate. The penalty so imposed shall be recoverable from any sum that may be then, or at any time thereafter may become due to the contractor, or from his security deposit, or the proceeds of sale thereof.

Clause-8 (b): Owing to difficulty in obtaining certain materials in the open market the Government have undertaken to supply materials specified in the schedule hereto annexed. There may be delay in obtaining materials by the Department and the contractor is therefore, required to keep himself in touch with the day to day position regarding the supply of materials from the Engineer-in-Charge and so adjust the progress of the

work that their labour may not remain idle nor may there be any other claim due to or arising from delay in obtaining the materials.

It should be clearly understood that no monetary claim whatsoever shall be entertained by the Government on account of delay in supplying materials. However, extension of time for completion of work can be granted on timely application by the contractor vide also Clause-4.

Clause-9 The contractor shall execute the whole and every part of the work in the most substantial and workmanlike manner, and both as regards materials and otherwise in every respect in strict accordance with the specifications. The contractor shall also confirm exactly, fully and faithfully to the designs, and drawings and instructions in writing relating to the work signed by the Engineer-in-charge and lodged in his office, and to which the contractor shall be entitled to have access at such office, for the purpose of inspection during office hour and the contractor shall, if he so require, be entitled at his own expense to make or cause to be made copies of the specification, and of all such designs drawings and instructions as aforesaid.

Clause-10 The Engineer-in-Charge shall have power to make any alterations in or additions to the original specifications, drawings, designs and instructions that may appear to him necessary & advisable during the progress of work, and the contractor shall be bound to carry out the work in accordance with any instructions which may be given to him in writing signed by the Engineer-in-charge and such alteration shall not invalidate the contract, and any additional work which the contractor may be directed to do in the manner above specified as part of the work shall be carried out by the contractor on the same conditions in all respects on which he agreed to do the main work, and at the same rates as are specified in the tender for the main work. The time for the completion of the work shall be extended in the proportion that the additional work bears to the original contract work and the certificate of the Engineer-in-charge shall be conclusive as to such proportion. And if the additional work includes any class of work, for which no rate is specified in this contract, then such class of work shall be carried out at the rates entered in the sanctioned schedule of rates of the locality during the period when the work is being carried on and if such last mentioned class of work is not entered in the schedule of rates of the district then the contractor shall within seven days of the date of his receipt of the order to carry out the work, inform the Engineer-in-charge of the rate which it is his intention to charge for such class of work, and if the Engineer-in-Charge does not agree to this rate he shall by notice in writing be at liberty to cancel his order to carry out such class of work and arrange to carry it out in such manner as he may consider advisable.

Works to be executed in accordance with specification, drawing and orders etc.

Alteration in specification & design

Do not invalidate contracts

Extension of time in consequence of alterations

Rates of work not in estimate or schedule of rates of the district.

No deviations from the specification stipulated in the contract or additional items of work shall ordinarily be carried-out by the contractor, nor shall any altered, additional or substituted work be carried out by him, unless the rates of the substituted, altered or additional items have been approved and fixed in writing by the Engineer-in-Charge.

The contractor shall be bound to submit his claim for any additional work done during any month on or before the 15th day of the following month accompanied by a copy of the order in writing of the Engineer-in-Charge for the

additional work and that the contractor shall not be entitled to any payment in respect of such additional work if he fails to submit his claim within the aforesaid period.

Provided always that if the contractor shall commence work or incur any expenditure in regard thereof before the rates shall have been determined as lastly herein before mentioned, then in such case he shall only be entitled to be paid in respect of the work carried out or expenditure incurred by him prior to the date of the determination of the rates as aforesaid according to such rates as shall be fixed by the Engineer-in-charge. In the event of a dispute, the decision of the Superintending Engineer of the Circle will be final.

Clause-11 If at any time after the commencement of the work the Government of Orissa shall for any reason whatsoever not require the whole thereof as specified in the tender to be carried out the Engineer-in-Charge shall give notice in writing of the fact to the contractor who shall have no claim to any payment or compensation whatsoever on account of any profit or advantage, which he might have derived from the execution of the work in full but which he did not derive in consequence of the full amount of the work not having been carried out, neither shall he have any claim for compensation by reason of any alterations having been made in the original specification drawings, designs and instruction which shall involve any curtailment of the work as originally contemplated.

No compensation for alteration in or restriction of work to be carried out.

Clause-12 If it shall appear to the Engineer-in-charge or his sub-ordinate-in-charge of the work that any work has been executed with unsound, imperfect or unskillful workmanship or with materials of any inferior description, or that any materials or articles provided by him for the execution of the work are unsound or of a quality inferior to that contracted for or otherwise not in accordance with the contract, the contractor, shall on demand in writing from the Engineer-in-Charge specifying the work, materials or articles complained of notwithstanding that the same may have been inadvertently passed certified and paid for forthwith rectify or remove and reconstruct the work so specified in whole or in part, as the case may require or as the case may be, remove the materials or articles so specified and provide other proper and suitable materials or articles at his own proper charge and cost and in the event of his failing to do so within a period to be specified by the Engineer-in-Charge in his demand aforesaid, then the contractor shall be liable to pay compensation at the rate of one percent on the amount of the estimate for every day not exceeding ten days, while his failure to do so shall continue and in the case of any such failure the Engineer-in-Charge may rectify or remove and re-execute the work or remove and replace with others, the materials or articles complained of as the case may be at the risk and expense in all respect of the contractor.

Action and compensation payable in case of bad work.

Clause-13 All work under or in course of execution or executed in pursuance of the contract shall at all time be opened to the inspection and supervision of the Engineer-in-Charge and his subordinates and the contractor shall at all times during the usual working hours and at all other times at which reasonable notice of the intention of the Engineer-in-Charge or his subordinate to visit the works shall have been given to the contractor either himself be present to receive orders and instruction, or have a responsible agent duly accredited in writing present for that purposes. Orders given to the contractor's agent shall be considered to have the same force as if they had been given to the contractor himself.

Work to
be open
for
inspection

Clause-14 The contractor shall give not less than five days notice in writing to Engineer-in-charge or his subordinate-in-charge of the work before covering up or otherwise placing beyond the reach of measurement of any work in order that the same may be measured and correct dimensions thereof be taken before the same is so covered up or placed beyond the reach of measurement, and shall not cover up or place beyond the reach of measurement, any work without the consent in writing of the Engineer-in-Charge or his subordinate-in-charge of the work and if any work shall be covered up or placed beyond the reach of measurement without such notice having been given or consent obtained, the same shall be uncovered at the contractor's expense, or in default thereof no payment or allowance shall be made for such work or the materials with which the same was executed.

Contractor
or
responsible
agents to be
present.

Notice to be
given before
work is
covered up

Clause-15 If the contractor or his work people, or servants shall break, deface injure or destroy any part of building in which they may be working or any building, road fence, enclosure, or grass land or cultivated ground contiguous to the premises on which the work or any part of it is being executed or if any damages shall happen to the work while in progress, due to any cause whatsoever or any imperfection became apparent in it within six months from the date of final certificate of its completion shall have been given by the Engineer - in-charge , as aforesaid the contractor shall make the same good at his own expense or in default the Engineer in-charge may cause the same to be made good by other workmen and deduct the expenses (of which the certificate of the Engineer-in-Charge shall be final) from any sums that may be then, or at any time thereafter may become due to the contractor or from his security deposit or the proceeds of sale thereof, or of a sufficient portion thereof and the contractor shall be liable to pay any part of the expenses not so recovered by the Engineer- In-Charge.

Clause -16 The contractor shall Supply, at his own cost all materials (except such special materials, if any as may in accordance with the contract be supplied from the Engineer-in-charge's stores). Plant, tools, appliances, implements, ladders, cordage, tackle scaffolding and temporary works requisite or proper for the proper execution of the work whether original, altered or substituted, and whether included in the specification or other documents forming part of the contract or referred to in these conditions or not or which may be necessary for the purpose of satisfying or complying with the requirement of the Engineer- In-Charge as to any matter as to which under this conditions he is entitled to be satisfied which he is entitled to require together with carriage therefore to and from the work. The contractor shall also supply without charge the requisite number of persons with the means and materials necessary for the purpose of

Contractor
to supply
plant
ladders,
scaffoldin
g etc.

setting out works, and counting, weighing and assisting in the measurement or examination at any time and from time to time of the work or materials. If the contractor fails to do so, the same may be provided by the Engineer-in-Charge at the expense of the contractor and the expenses may be deducted due to the contractor under the contract or from his security deposit or the proceeds of sale thereof, or of a sufficient portion thereof. The contractor shall

also
And is liable

non-
provisions of
lights
fencing etc.

provide all necessary fencing and lights required to protect the public from accident, and shall be bound to bear the expenses of defence of every suit, action or other proceedings at law that may be brought by any person for injury sustained owing to neglect of the above precautions, and to pay damages and cost which may be awarded in any such suit, action or proceedings, to any such person or which may with the consent of the contractor be paid to compromise any claim by any such person.

Clause-17(a) No female labour shall be employed within the limits of a cantonment. The contractor shall not employ for the purpose of this contract any person who is below the age of twelve years and shall pay to each labourer for the work done by such labourer, wages not less than the wages paid for similar work in the neighbourhood.

The Superintending Engineer shall have the right to enquire into and decide any complaint alleging that the wages paid by the contractor to any labourer for the work done, by such labourer is less than the wages paid for similar work in the neighbourhood. The officer-in-charge of the work shall have the right to decide whether any labourer employed by the contractor is below the age of twelve years and to refuse to allow any labourer whom he decides to be below the age of twelve years to be employed by the contractor.

Explanation - Fair wages means wages whether for time or piece work prescribed by the State P.W.D. provided that where higher rates have been prescribed under the minimum wages Act 1948 wages at such higher rates would constitute Fair wages,

Clause-17(b) The contractor shall if so required by the Engineer-in-Charge employ one or more Engineering Graduates or Diploma holders as apprentices at his own cost if the cost of the work as shown in the tender exceeds Rs. 2,50,000/- the apprentices will be selected by the Chief Engineer. The period of employment will commence within one month after the date of work order and would last till the date when 90% of the work is completed. The stipend to be paid to the apprentices should not be less than Rs 2000/- per month in the case of graduate Engineers and less than Rs. 1800/- per month in case of Diploma holders. The number of apprentices to be employed should be fixed by the Chief Engineer in a manner so that the total expenditure does not exceed 1% of the tendered cost of the work.

Clause – 17(c) “Special class contractor shall employ under him one graduate engineer and two diploma holders belonging to the state of Orissa, like wise “A” class contractor shall employ under him one graduate engineer or two diploma holders belonging to the state of Orissa. The employment of graduate engineer and diploma holders under the contractor shall be full time

and continuous and they should not be superannuated, retired, dismissed or removed personnel from any state govt. or central govt. service /Public Sector under taking / private companies and firms or be ineligible for appointment to govt. service. The contractor shall pay them monthly emoluments which shall not be less than the emoluments of the personnel of equivalent qualification employed under the state govt. of Orissa.

The Chief Engineer Roads Orissa may however assist the contractor with names of such unemployed Graduate Engineer or Diploma Holders if such help is sought for by the contractor. The names of such Engineering personnel appointed by the contractor should be intimated to the tender receiving authority along with the tender.

Each will of the special class or "A" class contractor shall be accompanied by an employment roll of the Engineering personnel together with a certificate of the Graduate Engineers or Diploma holders so employed by the contractor to the effect that the work executed as per the bill has been supervised by him.

Clause-18 The contract shall not be assigned or sublet without the written approval of the Superintending Engineer. If the contractor shall assign or sublet his contract or attempt to do so or become insolvent or commence any insolvency, proceedings or make any composition with his creditor or attempt so to do or if any bribe, gratuity, gift, loan perquisite reward, or adventage pecuniary or otherwise, shall either directly or indirectly be given, promised, or offered by the contractor, or any of his servants or agents to any public officer or person in the employment of the Government in any way resulting to his office employment, or if any such officer or person shall become in any way directly or indirectly interested in the contract, the Superintending Engineer may thereupon by notice in writing rescind the contract and the security deposit of the contractor shall there upon stand forfeited and be absolutely at the disposal of Government and the same consequences shall ensue as if the contract had been rescinded under the clause 2 hereof, and in addition, the contractor shall not be entitled to recover or be paid for any work thereto for actually performed under the contract.

Work not
to be sublet

Contract may
be rescinded
and security
deposit
forfeited for
subletting
bribing or if
contractor
becomes
insolvent

Clause-19 All sums payable by way of compensation under any of these conditions shall be considered as reasonable compensation to be applied to the use of Government without reference to the actual loss or damage sustained and whether or not any damage shall have been sustained.

Clause -20 In the case of a tender by partners, any change in the constitution of the firm shall be forth with notified by the contractor to the Engineer-in-Charge for his information.

Changes in
constitution of
firm

In case of failure to notify the change in the constitution within fifteen days the Engineer-in-Charge may by notice in writing rescind the contract and the security deposit of the contractor shall thereupon stand forfeited and be absolutely at the disposal of Government and the same consequences shall ensue as if the contract had been rescinded under clause 2 hereof, and in addition, the contractor shall not be entitled to recover or be paid for any works therefore actually performed under the contract.

Clause –21 All works to be executed under the contract shall be executed under the direction and subject to the approval, in all respects, of the Superintending Engineer of the Circle for the time being who shall be entitled to direct at what point or points and in what manner they are to be commenced and from time to time carried on.

Clause-22 Deleted as per works department no. 29449 dated 24.12.81.

Clause-23 When the estimate on which a tender is made includes lump sum in respect of parts of work the contractor shall be entitled to payment in respect of the items of work involved or the part of the work in question at the same rates as are payable under this contract for such items, or if the part of the work in question is not, in the opinion of the Engineer-in-Charge, capable of measurement, the Engineer-in-Charge may at his discretion pay the lump sum amounts entered in the estimate, and the certificate in writing of the Engineer-in-Charge shall be final and conclusive against the contractor with regard to any sum or sums payable to him under the provisions of this clause.

Lump sums in Estimates

Clause-24 In the case of any class of work for which there is no such specification as is mentioned in rule I, such work shall be carried out in accordance with the Circle specification and in the event of there being no circle specification, then in such case the work shall be carried out in all respect in accordance with the instructions and requirements of the Engineer-in-charge.

Action where no specification

Clause – 25 The Expression "work" or "works" where used in these conditions shall, unless there be something either in the subject or context repugnant to such construction, be construed and taken to mean the works by or by virtue of the contract, contracted to be executed, whether temporary or permanent and whether original, altered, substituted or additional.

Definition of works

Clause –26 Government shall be entitled to recover in full from the contractor any amount that the Government may be liable to pay under Workman's compensation Act VIII of 1923 to any workmen employed in course of execution of any part of the work covered by these contract.

Clause-27 That for the purpose of jurisdiction in the event of dispute if any the contract should be deemed to have been entered in to within the state of Orissa and it is agreed that neither party to the contract or agreement will be competent to bring a suit in regard to the matters covered by this contract at any place out side the state of Orissa.

Clause-28 The department will have the right to inspect the scaffolding and centering made for the work and can reject partly or fully such structure if found defective in their opinion.

Clause –29 Sanitary arrangements will be made by the contractor at his own cost for his labour camps.

Caluse-30 The contractor shall bear all taxes including sales tax, income tax, royalty, fair wages charges and tollage, where necessary.

Clause-31(a)

(i) If during the progress of the work, the price of any material (excluding cost, steel, cement & bitumen) incorporated in the work (not being materials supplied from the Engineer-in-charge's

store in accordance with clause..... thereof) increases or decreases as a result of increase or decrease in the average wholesale price index (all commodities), and the contractor there upon necessarily and properly pays in respect of that materials, (incorporated in the works). Such increased or decreased price, then he shall be entitled to reimburse or liable to refund, quarterly as the case may be such an amount as shall be equivalent to the plus or minus difference of 75 % in between the average wholesale price index (all commodities) which is incorporations / for the quarter under consideration and that operated for the quarter in which the tender was opened, as per the formulae indicated below provided that the work has been carriedout within the stipulated time or extension thereof, as are not attributable to him.

- (ii) Increase / decrease of cost of steel, cement and bitumen are to be reimbursed / liable to be refunded with prior approval of Government as follows : -
1. Steel – Rate as fixed by Steel Authority of India Ltd. (SAIL)
 2. Cement – Average factory price of three manufacturer of cement inside the state.
 3. Bitumen – Rate as fixed by Indian Oil Corporation (IOC).

Formula to calculate the increase or decrease in the price of the materials.

$$Vm = \frac{0.75x Pm x R(i-i_0)}{100 i_0}$$

Vm = Increase or decrease in the cost of work during the quarter under consideration due to changes in the rates of materials.

R = The value of work done in rupees during the quarter under consideration

i_0 = The average wholesale price index (all commodities) for the quarter in which the tender was opened (as published in RBI Bulletin)

i = The average wholesale price index (all commodities) for the quarter under consideration.

Pm = Percentage of materials component (specified in schedule of analysis) of the item.

Clause -31(b) Similarly, if during the progress of work, the wages of labour increase or decrease as a result of increase or decrease in the Average Consumer's Price Index for industrial workers wholesale price, and the contractor thereupon necessarily and properly pays in respect of labour engaged on execution of the work such increased or decreased wages, then he shall be entitled to reimbursement or liable to refund, quarterly as the case may be such an amount as shall be equivalent to the plus or minus difference in between the average consumer's price index for industrial workers wholesale price which is operating for the quarter under consideration and that operated for the quarter in which the tender was opened as per the formula indicated below, provided that the work has been carried out within the stipulated time or extension thereof as are not attributable to him.

Formula to calculate the increase or decrease in the cost of labour : -

$$V_L = \frac{0.75x P_L x R(i-i_0)}{100 i_0}$$

Where

V_L = Increase or decrease in the cost of work during the quarter under consideration due to changes in the rates of labour.

R = The value of work done in rupees during the quarter under consideration.

i_0 = The average consumer's price index for industrial workers (wholesale price) for the quarter in which the tender was opened. (as published in RBI bulletin)

i = The average consumer's price index for industrial workers (wholesale price) for the quarter under consideration.

P_L = Percentage of labour component (specified in the sculed of analysis) of the item.

Price adjustment and reimbursement of claim for escalation on labour under Clause-30(b) will be applicable only if there is any increase or decrease in the minimum wages by the Govt.

Clause -31(c) Similarly if during the progress of work, the price of petrol, oil and lubricants (Diesel oil being the representative item for price adjustment) increase or decrease as a result of the price fixed thereof by the Govt. of India and the contractor there upon necessarily and properly pays such increased or decreased price towards petrol, oil and lubricants used on execution of the work then he shall be entitled to reimbursement or liable to refund quarterly as the case may be such an amount as shall be equivalent to the plus or minus difference in between the price of POL which is operating for the quarter under consideration and that operated for the quarter in which the tender was opened as per the formula indicated below.

Formula to calculate the increase or decrease in the price of the POL

$$K_1 = \frac{0.75 \times K_2 \times R \times (D_2 - D_1)}{100 \quad D_1}$$

K_1 = Increase or decrease in the cost of work during the quarter under consideration due to changes in the price of POL

R = The value of work done in rupees during the quarter under consideration.

D_1 = The average price per liter of diesel oil which was fixed by the Govt. of India during the quarter in which the tender was opened.

D_2 = The average price per liter of diesel oil which is fixed during the quarter under consideration.

K_2 = Percentage of POL component as per sub-clause of this clause.

Clause -31(d) The following shall be the percentage of materials, labour and POL component for reimbursement / refund on variation in price of material, labour and POL as per sub-clause (a) (b) and (c) of this clause.

Category of work	Contractor's Supply			Departmental Supply of materials
	%of materials	% of labour	% of POL	
Irrigation Work (a)Structural Works (b) Earth Works (c) Canal Works (d)Embankment Works Etc.	20%	30%	5%	45%
	20%	60%	5%	15%
R & B Works (a) Bridge Works (b) Road Works (c)Building Works	20%	30%	5%	45%
	45%	40%	5%	10%
	30%*	30%	5%	35%

*Where brick is supplied by the department it should be 20% instead of 30%

Clause -31(e) Reimbursement / refund on variation in price of materials, labour and POL as per sub-clause (a), (b) and (c) of this clause shall be applicable only in respect of contract of one year or more provided that the work has been carried out within the stipulated time or extension thereof as are not attributable to contractor. However where the original contractual period is less than one year but subsequently it has been validly extended and period becomes one year or more escalation clause shall be applicable only for the balance portion of work to be executed beyond one year provided the delay is not attributable to the contractor.

Clause -31 (f) The contractor shall for the purpose of sub-clause (a), (b) and (c) of this clause keep such book of account and other documents as are necessary to show the amount of increase claimed or reduction available and shall allow inspection of the same by a duly authorized representative of Govt. and further shall at the request of the Engineer-in-charge furnish, verified in such manner as the Engineer-in-charge may require any document kept and such other information as the Engineer-in-charge may require.

The contractor shall within a reasonable time of his becoming aware of any alteration in the price of such materials, wages of labour or price of POL, give notice thereof to the Engineer-in-charge stating that the same is given pursuant to this condition together with an information relating thereto which he may be in a position to supply.

Clause -31 (g) In respect of canal/ dam contracts where there is change in methodology of execution (by mechanical means) as compared to those spelt out in the schedule of quantities and specification, the percentage component of labour, material P.O.L. and departmental material shall be refixed on actual observation. The same however, shall not exceed 34% in respect of labour and 11% in respect of P.O.L. The component of departmental material shall also not be less than 15%. [The price adjustment clause for increase/ decrease in minimum wage for works actually executed should be as per clause-30(b)]

Clause-32 After the work is finished all surplus materials and debris are to be removed by the contractor and preliminary works such as vats, mixing platforms, etc are to be dismantled and all materials removed from site. The ground upto 30 metre (100') wide from the building should be cleared and dressed.

FAIR WAGE CLAUSE

Clause -33

- a) The contractor shall not employ for the purpose of this contract any person who is below the age of twelve years and shall pay to each labourer for work done by such labourers fair wages.

Explanation: "Fair Wage" means wages, whether for time or piece work prescribed by the State Public Works Department provided that where higher rates have been prescribed under the Minimum Wages Act, 1948 wages at such higher rates should constitute fair wages.

The Superintending Engineer shall have the right to enquire into and decide any complaint alleging that the wages paid by the Contractor to any labourer for the work done by such labourer is less than the wages as per sub-paragraph -I above.

- (b) The Contractor shall, notwithstanding the provisions of any contract to contrary cause to be paid a fair wage to labourers indirectly engaged on the work including any labour engaged by his sub-contractors in connection with the said work as if the labourers had been immediately employed by him.

- c) In respect of all labour directly or indirectly employed in the work for the performance of the contractor's part of this agreement, the contractor shall comply with or cause to be complied with all regulations made by Government in regard to payment of wages, wage period deductions from wages, recovery of wages not paid and deductions unauthorisedly made, maintenance of wage register, wage cards publication of scale of wages and other terms of employment, inspection and submission of periodical returns and all other matters of a like nature.
- d) The Superintending Engineer or Sub-Divisional Officer concerned shall have the right to deduct, from the money due to the contractor, any sum required or estimated to be required for making good the loss suffered by a worker or workers by reason of non-fulfillment of the conditions of the contract for the benefit of the workers, non-payment of wages or of deductions made from his or their wages, which are not Justified by their terms of the contract or non-observance of the regulations Money so deducted should be transferred to the workers concerned.
- (e) Vis-Vis, the Government of Orissa, the contractor shall be primarily liable for all payments to be made under and for the observance of the regulations aforesaid without prejudice to his right to claim indemnity from his sub-contractor.
- (f) The regulations aforesaid shall be deemed to be a part of this contract and any breach thereof shall be breach of this contract.
- (g) Under the provisions of minimum wages Act 1948 and the minimum wages (Central rules 1950) the contractor is bound to allow or cause to be allowed to the labourers directly or indirectly employed in the work one day rest for six days continuous work and pay wages at the same rate as for duty. In the event of default, the Superintending Engineer or Sub-Divisional officer concerned shall have the right to deduct the sum not paid on account of wages for weekly holiday to any labourers and pay the same to the persons entitled thereto from any money due to the contractor.
- (h) The contractor shall at his own expenses provide or arrange for the provision of foot wear for any labourer doing cement mixing work and black topping of roads, (the contractor has undertaken to execute under his contract) to the satisfaction of the Engineer-in-Charge and on his failure to do so Government shall be entitled to provide the same and recover the cost from the contractor.
- (i) The contractor shall submit by the 4th and 19th of every month to the Engineer-in-Charge a true statement showing in respect of the second half of the preceding month and the first half of the current month respectively (1) the number of labourers employed by him on the work (2) their working hours (3) the wages paid to them (4) the accident that occurred during the said fortnight showing the circumstances under which they happened and the content of damage and injury caused by them and (5) the number of female workers who have been allowed maternity benefit according to clause (k) and the amount paid to them failing which the contractor shall be liable to pay to government a sum not exceeding Rs.50/- for each default to materially incorrect statement. The decision of the Superintending Engineer shall be final in deducting from any bill due to contractor amount levied as fine.
- (j) In respect of all labour, directly or indirectly employed in the works for the performance of the contractors part of this agreement, the contractor shall comply with or cause to be complied with all the rules framed by Government employed by the Orissa public works Department and its contractors. This will apply to work places having 50 or more workers.

(k) Maternity benefit rules for female workers employed by the contractor.

(l) Leave and pay during leave shall be regulated as follows:

1. **Leave**

a. **In case of Delivery** : - Maternity leave not exceeding 8 weeks, 4 weeks up to and including the day of delivery or 4 weeks following the days,

b. **In case of miscarriage**:- upto 3 weeks from the date of miscarriage.

2. **Pay**

(i) **In case of Delivery**: - Leave pay during maternity leave will be at the rate of the women's average daily earnings calculated on the total wages earned on the days when full time work was done during a period of three months immediately preceding the date on which she gives notice that she expects to be confined.

(ii) **In case of Miscarriage**: -Leave pay at the rate of average daily earning calculated on the total wages earned on the days when full time work was done during a period of 3 months immediately preceding date of such miscarriage.

Conditions of the Grant of Maternity Leave :- No-maternity leave benefit shall be admissible to a women unless she has been employed for a total period of not less than 6 months immediately preceding the date on which she proceeds on leave.

**MODEL RULES
FOR HEALTH AND SANITARY ARRANGEMENTS FOR WORKERS
EMPLOYED BY ORISSA P.W.D. OR ITS CONTRACTORS**

1. Application:

These rules shall apply to all construction works in-charge of Orissa Public Works Department which are expected to continue for a year or more.

2. Definitions:

1. Work place means a place at which an average of fifty or more workers are employed in connection with construction work.
2. Large work place means a place at which an average of 500 or more workers are employed in connection with construction work,

3. First Aid

- (a) At every work place there shall be maintained in readily accessible place first aid appliances including an adequate supply of sterilizer dressings and sterilized cotton wool. The appliances shall be kept in good order and in large work place they shall be readily available during working hours.
- (b) At large work places where hospital facilities are not available within easy distance of the works first aid posts shall be established and run by a trained compounder.
- (c) Where large work places are remote from regular hospitals an indoor ward shall be provided with one bed for every 250 employees.
- (d) Where large work places are situated in Cities, Town or in their suburbs and no beds are considered necessary owing to the proximity of city town hospitals, an ambulance shall be provided to facilitate removal of urgent cases to this hospital. At the work place some conveyance facilities such as a car, shall be kept readily available to take injured person or persons suddenly taken seriously ill, to the nearest hospitals.

4. Drinking water

- (a) In every work places there shall be provision of sufficient supply of water fit for drinking at suitable places easily accessible to labour.
- (b) Where drinking water is obtained from an intermittent public water supply, each place shall be provided with storage where such drinking water shall be stored.
- (c) Every water supply storage shall be at a distance of not less than 15 M, from any latrine, drain or other source of pollution. Where water has to be drawn from an existing well, which is within such proximity of latrine, drain or any other source of pollution, the well shall be properly chlorinated before water is drawn from it for drinking. All such well shall be entirely closed in and be provided with a trap door, which shall be waterproof.
- (d) A reliable pump shall be fitted to each covered well, the trap doors shall be kept locked and opened only for cleaning or inspection which shall be done at least once a month.
- (e) The temperature of drinking water supplied to workers shall not exceed 90°F.
- 5. Washing and bathing place:**
- (i) Adequate washing and bathing place shall be provided separately for men and women
 - (ii) Such places shall be kept in clean and drained condition.
- 6. Scale of accommodation in latrines and Urinals :** There shall be provided within the premises of every work place latrines and urinals in an accessible place and the accommodation separately for each of them shall not be less than the following.
- | | |
|---|------------------------|
| a) Where the number of persons employed does not exceed 50 | No of seats 1 |
| b) Where the number of persons exceeding 50 but does not exceed 100 | No of seats 3 |
| c) For every additional 100
(in particular cases the Superintending Engineer shall have the power to vary the scale where necessary) | No. of seats 3 per 100 |
- 7. Latrines and Urinals for Women :** If women are employed, separate latrines and urinals separate from that for men and marked in the vernacular in conspicuous letter "for women only" shall be provided on the scale laid in rule Those for men shall be similarly marked "for men only". A poster showing the figure of a men and a women shall also be exhibited at the entrance of latrines for each sex. There shall be adequate supply of water close to the urinals and latrines.
- 8. Latrines and Urinals :** - Except in work places provided with water flushed latrines and urinals connected with a water borne sewerage system all latrines shall be provided with receptacles on dry earthen system which shall be cleaned at least four times daily and at least twice during working hours and kept in a strictly sanitary condition. The receptacles shall be tarred inside and outside at least once a year.
- 9. Construction of latrines :** The inside wall shall be constructed of masonry or stone materials and shall be cement washed inside and outside at least once a year. The dates of cement washing shall be noted in register maintained for this purpose and kept available for inspection.
- 10. Disposal of Excreta:** Unless otherwise arranged for by the local sanitary authorities arrangements for proper disposal of excreta by incineration at the work place shall be made by means of a suitable incinerator approved by Asst. Director of Public Health or Municipal Medical Officer of Health as the case may be, in whose jurisdiction the work place is situated. Alternatively excreta may be disposed off by putting a layer of night soil at the bottom of pucca tank prepared for the purpose and covering it with a layer of waste or refuse and then covering it up with a layer of 6" layer of waste or refuse and then covering it up with a layer of each for a fortnight (when it will turn into manure)

11. **Provision of shelters during rest :** At every work place there shall be provided free of cost two suitable sheds one for meals and the other for rest for the use of labourers . The height of the shelter shall not be less than 11 feet from the floor level to the lowest part of the roof.
12. **Creche :** (a) At every work place at which more than 50 women workers are employed, there shall be provided only one hut for the use of children under the age of 6 year belonging to such women and shall be used for infant's games and play and their bed room. The hut shall not be constructed on a lower standard than the following.
 - (i) Thatched roofs
 - (ii) Mud floors and wall
 - (iii) Planks spread over the mud floor and covered with matting

The hut shall be provided with suitable and sufficient opening for light and ventilation. There shall be adequate provision for sweepers to keep the place clean. There shall be two Dhais in attendance Sanitary Utensils shall be provided to the satisfaction of the health officer of the area concerned. The use of the hut shall be restricted to children, their attendants and mothers of the children.

- b) Where the number of women workers are more than 50 the contractor shall provide one hut and one dhai to look after the children of women workers.
- c) The size of creche shall vary according to the number of women workers
- d) The creche shall be properly maintained and necessary equipment like toys etc shall be provided.
13. **Canteen:** A cooked food canteen on a moderate scale shall be provided for the benefit of workers whenever it is considered expedient

Orissa: P.W.D. / Electricity Department Contractor's Labour Regulations.

1. **Short title :** These regulations may be called " The Orissa Public Works Department/ Electricity Department Contractor's Regulations
2. **Definition :** In these Regulations unless otherwise expressed or indicated the following words and expression shall have the meaning hereby assigned to them respectively, that is to say :
 - (1) "Labour" means workers employed by a contractor of the Orissa Public Works Department / Electrical Department directly / indirectly through a sub-contractor or other person, or by an agent on his behalf.
 - (2) "Fair Wages" means wages whether for time or piece work prescribed by the State Public Works Department provided that where higher rates have been prescribed under the Minimum Wages Act 1948 wages at such higher rates should constitute fair wages.
 - (3) "Contractor" shall include every person whether a Sub -contractor or headman or agent employing labour on the work taken on contract.
 - (4) "Wages" shall have the same meaning as defined in the payment of wages Act and include time and piece rates wages, if any
3. **Display of notice regarding wages etc.-** The contractor shall : -
 - (a) Before he commences his work on contract, display and correctly maintain and continue to display and correctly maintain, in a clean and legible condition, in conspicuous places on the work, notice in English and in the local Indian language spoken by the majority of the workers, giving the rate of wage prescribed by the State public Works Department/Electricity Department for the district which the work is done.
 - (b) Send a copy of such notice to the Engineer-in-charge of the work.

4. Payment of wages.

- (1) Wages due to every worker shall be paid to him direct.
- (2) All wages shall be paid in current coin or currency or in both.

5. Fixation of wage period.

- (1) The contractor shall fix the wage period in respect of which the wages be payable.
- (2) No wage period shall exceed one month.
- (3) Wages of every workman employed on contract shall be paid before the expiry of ten days, after the last day of the wage period in respect of which the wages are payable.
- (4) When the employment of any worker is terminated by or on behalf of the contractor, the wages earned by him shall be paid before the expiry of the day succeeding the one on which his employment is terminated.
- (5) All payments of wages shall be made on working day.

6. Wage book and wage cards etc.

- (1) The contractor shall maintain a wage book of each worker in such form as may be convenient, but the same shall include the following particulars:
 - (a) Rate of daily or monthly wages.
 - (b) Nature of work on which employed.
 - (c) Total number of days worked during each wage period.
 - (d) Total amount payable for the work during each wage period.
 - (e) All deductions made from the wages with an indication in each case of the ground for which the deduction is made.
 - (f) Wage actually paid for each wage period.
- (2) The contractor shall also maintain a wage card for each worker employed on the work.
- (3) The Superintending Engineer may grant an exemption from the maintenance of wage bond, wage cards to a contractor who, in his opinion may not directly or indirectly employed more than 100 persons on the work.

7. Fines and deductions which may be made from wages: -

- (1) The wages of a worker shall be paid to him without any deduction .of any kind except the following.
 - (a) Fines
 - (b) Deduction for absence from duty i.e., from the place or places where by the terms of his employment he is required to work .The amount of deductions shall be in proportion to the period for which he was absent.
 - (c) Deductions for damages or loss of goods expressly entrusted to the employed person for custody or for loss of money for which he is required to account where such damages or loss is directly attributable to his neglect or default.
 - (d) Any other deductions, which the Government may from time to time allow.
- (2) No fines shall be imposed on a worker and no deduction for damage or loss shall be made from his wages until the workers has been given an opportunity of showing cause against such fines or deductions.
- (3) The total amount of fines which may be imposed in any one wage period on a worker shall not exceed an amount equal to five paise in a rupee of the wages payable to him in respect of that wage period.

- (4) No fine imposed on any worker shall be recovered from him by installments or after the expiry of 60 days from the date on which it was imposed.

8. Register of fines, etc.

- (1) The contractor shall maintain a register of fines and of all deduction for damage or loss, such register shall mention the reason for which fine was imposed or deduction for damages or loss was made.
- (2) The contractor shall maintain a list in English and in the local Indian language clearly defining acts and omissions for which penalty or fine can be imposed. It shall display such list and maintain it in a clean and legible condition in conspicuous places of the work.

9. Preservation of register

The wage register, the wage card and the register of the fines, deductions required to be maintained under these regulations shall be preserved for 12 months after date of the last entry made in them.

10. Power of Labour Welfare Officer to make investigation or inquiry

The labour Welfare Officer or any other persons authorized by the Government of Orissa on their behalf shall have power to make enquiries with a view to ascertaining and enforcing due and proper observance of the fair wage clauses and the provisions of these regulations. He shall investigate into any complaint regarding default made by the contractor in regard to such provisions,

11. Report of labour Welfare Officer

The labour Welfare officer or other authorized as aforesaid shall submit a report of the result of his investigation or enquiry to the Superintending Engineer concerned indicating the extent if any to which the default has been committed with a note that necessary deduction from the contractors bill be made and the wages and the other dues be paid to the labourers concerned.

12. Appeal against the decision of Labour Welfare Officer

Any person aggrieved by the decision and recommendation of the labour Welfare Officer or other person so authorised may appeal against such decision to the labour Commissioner within 30 days from the date of decision forwarding simultaneously a copy of his appeal to the Superintending Engineer concerned but subject to such appeal, the decision of the officer shall be final and binding upon the contractor.

13. Inspection of Registers

The contractor shall allow inspection of the wage book and wage cards to any of his workers or to his agent at a convenient time and place after due notice is received, or to the Labour Commissioner or any other person authorised by the Government of Orissa on his behalf.

14. Submission of Return

The contractor shall submit periodical returns as may be specified from time to time.

15. Amendment

Government of Orissa may from time to time, add to or amend these regulations and on any question as to the application, interpretation of the effect of these regulations, the decision of the Labour Commissioner or any other person authorized by the Government of Orissa in that behalf shall be final.

SPECIAL CONDITIONS

All the earthwork pits should be on country side and at least 15 Mt. away from the top of embankment works.

All Measurements for earthwork will be taken by section measurement.

Tenderer is to sign the initial and final level and longitude section and cross section of the existing ground level before starting execution of works. Final level will be taken after completion of the work in all respect.

The contractor is to give labour for giving section and profiles. All materials necessary for such work will be supplied .by the contractor and the profiles is to be maintained till the work is completed.

The contractor should keep himself in constant touch with Engineer -in -charge for smooth execution of the work and arrange for adequate labour depending on the workload and working space available. No. claim to detention of labour on any account will be entertained. It is the responsibility of the contractor to arrange earth to the extent required for the work at his, own cost and risk.

The contractor should engage local labour on priority basis during execution of the work.

For each work in embankment there will be minimum distance of 15M.between the toe of the embankment and the borrow pit.

For earthwork in cutting reaches, the spoils should be deposited as directed by the Engineer- in -charge.

1. The renderer should inspect the site of work before tendering and in case of any clarification should consult the Engineer -in -charge.
2. Any royalty or any other taxes if any, for executing the work will be borne by the contractor.
3. The Engineer contractor who want to E.M.D exemption have to give and affidavit with the tender declaring there in to the effect that they have not yet participated for three number of works with exemption of EMD during this financial year and they need to show the original registration certificate to the tender accepting authority for confirmation at the time of opening of tender failing which their tender will be outrightly rejected.

IN ADDITION TO THE ORISSA STANDARD SPECIFICATIONS THE FOLLOWING
SPECIFICATION ARE FURTHER ADDED TO
SPECIFICATION FOR CONSTRUCTION OF EARTHDAM

1. GENERAL

The construction of the earth dam shall be carried out according to these specifications drawing and authorised deviations issued here after. The preliminary operations for laying out dug being fixing pegs, giving profiles and line marks etc. prior to and during construction will be done by technical staff, but the necessary materials, such as peg spikes lime bamboos sign posts and sign boards etc and the labours required for such preliminary operations shall be supplied by the contractor.

IN ADDITION TO THE ORISSSA STANDARD SPECIFICATIONS
THE FOLLOWING SPECIFICATIONS ARE FURTHER ADDED TO
SPECIFICATON FOR CONSTRUCTION OF EARTH DAM

1. GENERAL -

The construction of the earth dam shall be carried out according to these specifications drawings and authorised deviations issued here after. The preliminary operations for laying out, dug bellring, fixing pegs, giving profiles and line marks etc. prior to and during construction will be done by technical staff, but the necessary materials, such as pegs, spikes lime bamboos, sign posts and sign boards etc. and the labourers required for such preliminary operations shall be supplied by the contractor.

2. CLEARING WORK AREAS -

The area to be occupied by the dam and a 10ft. wide strip on either side measured beyond and continuous to the limit lines of the former shall be cleared of all trees, fencing stumps, bush and other growth or encumbrances. All roots more than one inch in diameter shall be removed from the area. All bush and trees shall be removed from the work vicinity and burnt or otherwise disposed off to the satisfaction of the Engineer-in-charge. All mole hills are to be dug out till the queen ants are obtained and the same is back filled with earth at O.M.C. as per point 7. Payment will be made on basis of area so cleared.

3. STRIPPING -

All loman auck, vegetation perishable material and any other objectionable shall be stripped and removed from the base of the dam including 10 feet wide strip beyond and continuous to the seat of dam on either side. If any dewatering will be necessary for base stripping, the same should be done by engaging pumps by the contractor. The stripping materials will be disposed off and dumped in a special bank in such places which will not interfere in construction and functioning of projects or as directed by Engineer-in-Charge.

4. PREPARATION OF EMBANKMENT BASE -

The base of the dam shall be ploughed to a depth of about 4 inch in a direction parallel to the one of embankment at close interval or otherwise picked and roughened to provide a satisfactory bond with the new embankment materials. All steep slopes shall be stepped. Loose boulders are to be removed. Firm rocks are to be roughened covered with clay slurry. Each layer is to be put at optimum moisture contents and compacted manually by ramming or by other compaction units mechanically till a level surface is obtained.

5 (I) EXCAVATION OF CUT OFF TRENCH -

The cut off trench shall be excavated along the base of the dam as shown in the drawing. The depth of the trench may be suitably varied if found necessary by the Engineer-in-charge according to site condition and must be taken atleast 2'-0" in the imperative strata. Accurate trimming of the slopes or excavation is not required. The area to be excavated shall be dewatered. The water level shall be maintained below the level of excavation and re-excavation shall be performed in standing water. If for the purpose of maintaining the section of cut off trench shoring and shuttering will be found necessary the same will be done by the contractor. The materials excavated from the cut-off trench will be utilised in construction if found suitable or otherwise disposed off as directed by the Engineer-in-charge.

(II) BORROW AREA GENERAL -

All materials required for construction of earth fill will be obtained from areas marked for the purpose by the Engineer-in-charge. No borrow pit should be opened within ten times the depth of retention of water at any section of embankments from the toe and hill of the dam. The bottom of the borrow pit in no case should be below the 4:1 gradient line drawn from the toe of the dam. The operations in excavation of materials in borrow pits shall be such as will result in an acceptable gradation of the materials when compacted. The Engineer-in-charge will design the depth and place of excavation for all parts of the borrow pits necessary for obtaining the desired gradation of materials. Borrow pits shall be finished as directed by the Officer-in-charge.

6 (i) CLEARING AND STRIPPING BORROW AREA -

All areas required for borrow pits for selected materials shall be cleared of all trees and stumps and all roots and other objectionable materials shall be completely removed. Particular care shall be taken so that all organic matter is excluded from materials which is to be placed in the embankment. All such materials shall be disposed off to the satisfaction of the Engineer-in-charge. The cleared area shall be maintained free of vegetable growth during the progress of the work.

The sites of borrow pits for selected materials shall be carefully stripped of top soil, sod, loam and other objectionable matter. If materials unsuitable or not required for embankment purpose are found in borrow pits, such materials shall be left in place of excavated and wasted as directed. No payment will be made for clearing and stripping the borrow area.

6 (ii) BORROW AREAS WATERING -

The initial moisture content in the borrow pits shall be estimated with the help of laboratory tests. The optimum moisture content for the materials in the particular borrow pit shall be obtained by the inspector from the field laboratory knowing the optimum moisture content and the initial moisture content the amount of additional water required for the borrow pit shall be calculated. The required additional moisture shall be introduced into the borrow pits by watering well in advance of excavation operations to ensure uniformity of moisture content in order to avoid the formation of pools in borrow pits during the excavation operation or after the excavation operation are completed and for the reduction of excessive moisture content drainage ditches shall be constructed where necessary.

7. EXCAVATION OF FOUNDATION FOR RIPRAP AND ROCK TOE -

Where so indicated on the drawing the foundation for riprap filter layer and rock toe on the upstream and downstream sides shall extend to disintegrated rock or other suitable materials. However unless specially called for such excavation should not be deeper than 5'-0" below the original ground surface.

8. DAM EMBANKMENT GENERAL -

The embankment shall be constructed to the slope lines and grades as per final design increased by such heights and with determined as necessary to allow for settlement except that division lines between the zones of the embankment may be varied as determined by the relative quantities of the special classes of materials available from the borrow area. However no change shall be made unless analysis has included that the stability of the embankment is not impaired.

8 (i) PLACING THE FILL -

The materials from the borrow area will be carried either by head load or by machines as per the site conditions and will be placed in position as instructed by the Engineer-in-charge. The placing of fill shall unless otherwise permitted be commenced in the deeper sections and be carried up approximately levelled in layers extending entirely through the fill. In any case the top of any unfinished portion of the embankment shall not have a slope steeper than 1 to 10 in any direction. The fill should not contain stones bigger than 3" in any direction.

8. (2) SPREADING -

Sections for different layers will be marked by the department by pegs and flags. After the fill is dumped at predetermined place it will be spread 1'-6" beyond limits of the desired sections to uniform layers of not more than 9" thickness so that the thickness of the compacted layer will be within 6".

8. (3) COMPACTION -

Unless the foundation surface already contains the optimum amount of moisture the surface should be liberally moistened before the first layer placed so that when the roller goes over this first layer, it will force the new materials down into the old and level undividing plans. For this purpose smooth cracked layers of old work is to be scarified and moistened before receiving further earth. The full thickness of each subsequent layer shall be uniformly moistened to bring filled moisture to about 2 percent proctor O.M.C. to secure maximum density in the compacted fill with reasonable number of passes of the roller. If the water content of the fill at the time of placing is more than that required for attaining optimum density., it should

be allowed to dry up after each layer is compacted. Test samples of each layer will be taken and tested to ascertain whether the designed results have been obtained and field dry density is found 98 percent of the standard proctor maximum dry density. The next layer will be placed only when the compaction is found to be satisfactory by the Engineer-in-charge. The cut-off trench in the foundation will be filled and compacted in the same way as the main body of the dam. In case the whole length of an embankment is not constructed simultaneously the incomplete ends of embankment shall be placed at a slope not steeper than 1 in 5 to permit satisfactory bonding with the portion of embankment which is constructed later. If dewatering of the cut-off trench will be necessary, the same will be done, special precaution is to be taken at the joint of masonry or rock with earth dam as per para 4. About 1'6" extra is to be dumped on either side for roller to work properly to bring out adequate density on slope and this extra to be cut and used over dam. No extra payment will be made for this and for removal of roots or other undesirable materials in the soil.

8. (4) DRESSING SLOPES -

The outside slopes of the dam shall be dressed to lines as the placing of fill progress is so that the slopes will not show any humps and hollows varying more than 3" in 10 ft. in any direction. Slopes shall be maintained until final completion and acceptance. Any materials lost by watering shall be replaced and compacted.

8. (5) TURFING -

The downstream slopes is to be turfed above rock toe as shown in the drawing. Where sods are available this should be cut from a dense growth of grass. The soil being heavy enough to withstand handling and shall be laid fresh. A strip sod not less than 3" deep and 9" wide should be placed first and the subsequent strips should be so placed that the joints of sods down the slopes should be staggered. If sods are not available to meet the requirements seeds of approved variety may be planted with proper approval of the Engineer-in-charge and if necessary fertilisers should be used. In case of plantation of seeds, payment will be made only after the turf is grown to the satisfaction of the Engineer-in-charge.

9. GRADED FILTER UNDERNEATH RIPRAP AND ON ROCK TOE -

Graded filter are proposed underneath the riprap on the upstream slope of the dam and on the upstream slope of the downstream rock separating it from the earth fill and below the rock toe as indicated on the drawing.

9. (1) PLACING OF FILTER -

Before placing the filter, the underlying slope shall be trimmed neatly to be graded as mentioned in para 7-4. Each layer of filter shall be uniform in thickness. The gradation should be as per the approval of the Engineer-in-charge. The contractor is responsible for protecting the filter from being mixed up with the materials of the fill of embankment during construction. Each layer shall be well watered and compacted. Materials from one layer to the other shall not be allowed to mix. After completion of the filter blanket, earth fill material shall be placed in 4 inch layers and tamped by hand at optimum moisture. After material has been placed to a depth of 2'-0" with hand compaction, further layer of each fill shall be placed in accordance with provision for rolling.

9. (2) MATERIALS -

The thickness specified shall be measured normal to the slope. The filter materials shall be clean, sound, well graded sand and gravel. No articles of decomposed rock, debris, wood, vegetable matter or other deleterious materials shall be permitted. The filter may be put in 6" layers when the thickness exceeds 9". If directed by the Engineer-in-charge, in which case the fine layer of the filter shall be placed adjacent to the material to be protected the coarsest layer of filter shall be placed adjacent to the riprap or rock fill.

10. WEATHER CONDITION -

Embankment material shall be placed only when the weather conditions are satisfactory to permit accurate control of the moisture content in the embankment materials. During that part of the construction period when the top surface of embankment may be subject to rainfall causing cessation of work. The work will only be resumed when the surface is properly dry.

11. MOISTURE CONTROL -

Prior to and during the compacting operations, the materials in each layer of the earth fill shall have optimum practicable moisture content required for compaction purposes uniformly distributed throughout the layer. This moisture content shall be approximately 2 or 3 percent less than the optimum moisture content determined by a proctor compaction test as determined by the laboratory or as determined by an embankment test section. Laboratory investigation may impose some restrictions on the upper and lower limits of the practicable moisture content on the basis of studies of consolidation and more in the embankment. Hereinafter the term range of optimum practicable moisture content shall refer to values as described above. Moisture control shall be strictly adhered to. Tests shall be made to ensure that material has the proper moisture content. If additional moisture is required it shall be added by sprinkling before rolling of the layer. If the moisture content is greater than required, material shall be spread and allowed to dry before starting rolling.

The moisture content shall be relatively uniform throughout the layer of material and ploughing, disking, harrowing or other mixing may be required to obtain uniform distribution in moisture content, if it is not uniformly distributed throughout the layer, rolling and adding of further layers shall be stopped and shall be started again only when the above conditions are satisfied.

12. TAMPING -

If those places of the structure inaccessible to the specified rolling equipment, around and in contact with structures and in proximity to structures where the rolling equipment will not be permitted to operate compaction shall be accomplished by pneumatic or mechanical tampers of approved type. Roller will be permitted to operate within 5 feet of concrete structures and all fill within this distance shall be treated as mentioned above.

All materials to be tamped shall be spread in layers not over 4 inches thick when loose. The moisture content of the material and the amount of tamping shall be such as to produce a degree of compaction equal to that specified for roller fill. Special care shall be exercised to obtain a good contrast and bond with surfaces of concrete structures.

13. RIPRAP -

The upstream face of the dam will be protected by hand packed riprap laid over the graded filter. The thickness of the riprap will be uniform as shown in the drawing. It should consist of broken rock fragments hard double and best quality available in the vicinity of the work. The pieces shall not be more than 1/4th cubic yard and less than 4" in volume. No stone shall have any dimension less than 4 inches.

A tolerance of 2 to 3 inches in the thickness of riprap may be permitted. The stones shall be placed with the broadest base down and face normal to the slope. Rock fragments and spells shall be tightly given in to the interstices to wedge the riprap in place and close direct opening to the underlying slope. The finished riprap shall present reasonably smooth and uniform surface free of loose stones. Selected long stone placed as shown on drawings will serve as wave breakers. The Engineer-in-charge will direct their placing and the size will be as per his approval.

14. PLACING ROCK FILL ON UPSTREAM AND DOWNSTREAM TOE OF EMBANKMENT -

The rock fill shall be placed in horizontal layers not exceeding 3 ft. in thickness. The material will not be hand placed or especially compacted, but shall be dumped and roughly levelled in a manner satisfactory to the Engineer-in-charge as to maintain reasonably uniform surface and ensure that the completed fill will be stable and that there will be no large unfilled space within the fill.

Payment for the riprap, rock toe and pitching will be made at the price bid in schedule. The unit price will include the developing the rock sources, excavation of extra partial earth if any loading, transporting stock piling if required and placing the materials to designed sections and all other operations necessary.

15. All haul roads required for collection or supply of materials by the contractor in connection with the work will be constructed and maintained by him. No payment will be made further.

CONCRETE WORKS

4.0 CONCRETE STRUCTURES

Concrete in structures shall conform to the requirements of paragraphs at 4.1.1.

4.1 CONSTRUCTION OF STRUCTURES

The item of the schedule for concrete in the structures includes all cast-in-place concrete in the structure. Concrete to be Cast-in-place for all the structures shall conform to the requirement of section 4.2 below. Pipe and fitting of miscellaneous metalwork, mechanical and electrical equipment and other items forming a part of the structures are provided for elsewhere in these specifications.

The structures shall be built to the lines, grades, and dimensions shown on the drawings. The dimensions of each structure as shown on the drawings will be subject to such modifications as may be found necessary by the Engineer-in-charge to adapt the structure to the conditions disclosed by the excavation or to meet other condition. Where the thickness of any portion of a concrete structure is variable, it shall vary uniformly between the dimensions shown.

Where necessary, the contractor shall be furnished with additional detail drawings of the structures to be constructed as determined by the Engineer-in-charge. The contractor will not be entitled to any additional allowances above the price bid in the bill of quantities by reason of the dimensions fixed by the Engineer-in-charge or by reasons of any modifications or extension of a minor character to adopt a structure at site.

The cost of furnishing of all materials and performing all work for installing timber, metal and other accessories for which specific price are not provided in the schedule, shall be included in the applicable prices bid in the schedule for the work to which such items are appurtenant.

4.2 GENERAL CONCRETE REQUIREMENTS

4.2.1 COMPOSITION

Concrete shall be composed of cement, sand, coarse aggregate, water, admixtures (if any) as specified and all will be mixed in batching plant/ concrete mixers by weight and brought to the proper consistency. Batching plant shall conform to IS: Code 4925-1968.

For works in which water tightness is required the specification in IS: 3370-1965 Para 1 to 10 shall be adopted.

4.2.1.1 MIXING:

Concrete shall be mixed in a mechanical mixer and shall be as dense as possible, plastic enough to consolidate, well and stiff enough to stay in place on the slopes.

Mixing shall be continued until there is a uniform mixing of the materials and the concrete is uniform in colour and consistency. The time of mixing shall be as shown in table-1 of IS 457-1957 reproduced below.

Capacity of Mixer	Minimum time for Mixing	
	Natural Aggregates	Manufactured Aggregates.

All mixers	2 minutes	2-1/2 minutes.
------------	-----------	----------------

4.2.1.2 NOMINAL MAXIMUM SIZE OF AGGREGATES:

Sizes of aggregates shall conform to IS: 383-1970. The coarse aggregates to be used in concrete shall be as large as practicable, consistent with required strength, spacing of reinforcement and embedded items and placement thickness. The size of the coarse aggregates to be used will be determined by the Engineer-in-charge and may vary incrementally according to the conditions encountered in each concrete placement. Nominal maximum size of aggregates for concrete in structures and canal lining shall be as indicated in the relevant drawings appended to the contract documents. When proper placement of concrete is impracticable with the size of the aggregate specified in the drawings, smaller coarse aggregates than specified shall be used as per the opinion of the Engineer-in-charge.

4.2.1.3 MIX PROPORTIONS:

The proportions of various ingredients to be used in the concrete for different items of the work are given in the bill of quantities. In proportioning concrete, the quantity of both cement and aggregate should be determined by weight, specified in the design mix. Water shall be measured in either by volume in calibrated tanks or weighed. Batching plant shall conform to IS: 4925-1968 (Indian Standard Specification for batching and mixing plant). All measuring equipments shall be maintained in a clean serviceable condition and their accuracy periodically checked. Adjustment shall be made as directed to obtain concrete having suitable workability, impermeability, density, strength and durability without the use of excessive cement. The acceptance or rejection of concrete shall be as per the acceptance criteria laid down in clause-16 of IS: 456-2000.

The water cement ratio exclusive of water absorbed by the aggregate shall be sufficiently low to provide adequate durability in concrete. The water cement ratio of various grades of concrete shall be as determined and ordered by the Engineer-in-charge. Admixture of Pozzolana, if ordered, shall conform to the requirements specified in IS: 9103-1979 (Indian Standard Specification for Admixtures for concrete).

4.2.1.4 CONSISTENCIES:

The slump of concrete at the placement shall be as follows:

Sl. No.	Place condition	Degree of workability	Value of workability.
1.	Concreting of light reinforced sections without vibration or heavily reinforced section	Medium	25mm to 75mm slump for 20 mm aggregate.

	with vibrations.		
2.	Plain concrete work	-do-	-do-
3.	Lining with slip form machine for concrete paver finish	-do-	60 to 70 mm slump

If the specified slump is exceeded at the placement, the concrete is unacceptable. The Engineer-in-charge reserves the right to require lesser slump whenever concrete of such lesser slump can be consolidated readily into place by means of vibration specified by the Engineer-in-charge. The use of equipment, which will not readily handle and place concrete of the specified slump will not be permitted.

To maintain concrete at proper consistency, the amount of water and sand batched for concrete shall be adjusted to compensate for any variation in the moisture content or grading of the aggregates as they enter the mixer. Addition of water to compensate for stiffening of the concrete after mixing and before placing will not be permitted. Uniformity in concrete consistency from batch to batch will be required.

4.2.2 CONCRETE QUALITY CONTROL MEASURES AND QUALITY ASSURANCE TESTS

4.2.2.1 CONCRETE QUALITY CONTROL MEASURES

- a. The contractor shall be responsible for providing quality concrete to ensure compliance of the contract requirements.
- b. Making and cutting concrete test specimens in the field will conform to IS 516-1959
- c. Capping cylindrical concrete specimens will conform to IS 516-1959
- d. Compressive strength of concrete specimens will conform to IS 516-1959.

4.2.2.2 SAMPLING PROCEDURE AND FREQUENCY

- a. A random sampling procedure shall be adopted to ensure that each concrete batch has a reasonable chance of being tested i.e. the sampling should be spread over the entire period of concreting and should cover all mixing units.
- b. FREQUENCY : The frequency of sampling of concrete of each grade shall be in accordance with the following-

Quantity of	Number of samples.
1 to 5	1
6 to 15	2
16 to 20	2
21 to 50	4
51 and above.	4 plus one additional

Note: At least one sample shall be taken during each shift.

4.2.2.3 TEST FACILITIES

The contractor should supply in free of cost, the samples of all the ingredients of concrete used in the work for the test to be conducted by the Engineer-in-charge or any officer nominated by him.

4.2.2.4 CONTRACTOR TO FURNISH DRAWINGS AND DATA

Not less than 30 days prior to start of installation of the contractor's plant and equipment for processing, handling, transporting, storing and proportioning concrete, the contractor shall submit its drawings and data to the Engineer-in-charge for approval, showing the arrangement of plant etc. The drawing and data shall provide a description in sufficient details for an adequate review of the facilities and equipment the contractor proposes to provide at site of work.

4.2.3 CEMENT

4.2.3.1 GENERAL

Cement shall conform to clause 5.1 to 5.1.3 of IS 456-2000 for the purpose of specifications. Cement used shall be any of the following with the prior approval of the Engineer-in-charge.

- a. 33 grade Ordinary or low heat Portland cement conforming to IS: 269-1989
- b. Rapid hardening Portland cement conforming to IS: 8041-1990
- c. Portland slag cement conforming to IS: 455-1989
- d. Portland Pozzolana cement conforming to IS: 1489-1991
- e. 43 grade ordinary Portland cement conforming to IS: 8112-1989
- f. Hydrophobic cement conforming to IS: 8043-1991
- g. 53 grade Ordinary Portland cement conforming to IS: 12269-1987

The provisions of this paragraph apply to cement for use in cast in place concrete required under these specifications. Portland cement required for items such as concrete pipes, pre-cast concrete structural members and other pre-cast concrete products for grout and mortar and for other items provided for, under appropriate paragraph of these specifications covering items for which such Portland cement is required.

The contractor shall make his own arrangements for the procurement of cement to required specifications required for the work. Transportation from the place of supply to the batching plant shall be in weather-tight rail cars, trucks, conveyors and other means, which will protect the cement completely from exposure to moisture. Immediately upon receipt at the jobsite, bulk cement shall be stored in dry, weather tight, properly ventilated bins until the cement is batched. The bins shall be emptied and cleaned by the contractor when so directed by the Engineer-in-charge. However, the intervals between required cleaning will normally be not less than 6 months. Each shipment of bagged cement shall be stored separately so that it may readily be distinguished from other shipment and shall be stored in a dry enclosed area protected from moisture. Storage of materials shall be as described in IS: 4082-1996 (IS recommendation on staking and storage of construction materials at site). To prevent under-aging of bagged cement after delivery, the contractor shall use bags of cement in the chronological order in which they were delivered to the job site. All storage facilities shall be subject to approval of the Engineer-in-charge.

4.2.3.2 ACCEPTANCE OF CEMENT.

Cement shall be supplied by the contractor according to clause 10.1 of IS: 269-1989.

4.2.3.3 ACCEPTANCE OF POZZOLANA:

Pozzolana added to the concrete as an admixture shall be sampled and tested as per IS: 9103-1999.

4.2.3.4 RECOVERY OF COST OF CEMENT IN WASTED CONCRETE ETC:

The cost of cement used in wasted concrete in replacement of damaged or defective concrete and extra concrete required because of over excavation and in concrete placed by the contractor in excavations intentionally performed to facilitate the contractor's operation shall be borne by the contractor himself. No extra payment shall be made to the contractor for such additional quantity.

4.2.4 ADMIXTURES

The contractor shall use air-entraining admixtures as directed by the Engineer-in-charge. Admixtures shall be of uniform consistency and quality and shall be maintained at the job site at uniform strength of solution. Admixtures shall be batched separately in liquid form in containers capable of measuring at one time the full quantity of each admixture required for each batch. Chemical admixtures, which harm the quality and strength of concrete, shall not be used in the concrete.

4.2.5 WATER

The water used in making and curing of concrete mortar and grout shall be free from objectionable quantities of silt, organic matter, injurious amounts of oils, acids, salts and other impurities etc. as per IS specification 456-2000.

The Engineer-in-charge will determine whether such quantities of impurities are objectionable. Such determination will unusually be made by comparison of compressive strength, water requirement, time of set and other properties of concrete made with distilled or very clean water and concrete made with the water proposed for use. Permissible limits for solids when tested in accordance with IS: 3025-1964 shall be as tabulated below:

4.2.5.1 PERMISSIBLE LIMITS FOR SOLIDS IN WATER

1. Organic solids : Maximum permissible limit 200 mg/l.
2. Inorganic solids : 300 mg/l.
3. Sulphate (as SO₄) : 500 mg/l.
4. Chlorides (as Cl) : 2000 mg/l for plain concrete work and 1000 mg/l for RCC work.
5. Suspended matter : 2000 mg/l.

The pH value of water shall generally be not less than 6 (six).

If any water to be used in concrete mortar or grout is suspected by the Engineer-in-charge of exceeding the permissible limits for solids, samples of water shall be obtained

and tested by the Engineer-in-charge in accordance with IS: 3025-1964.

4.2.6 SAND (FINE AGGREGATE)

4.2.6.1 GENERAL

The term sand is used to designate aggregate most of which passes 4.75 mm IS Sieve and contains only so much coarser material as permitted in clause 4.3 of IS: 383-1970. Sand shall be predominantly natural which may be supplemented with crushed sand to make up deficiencies in the natural sand grading.

All sand shall be procured by the contractor from approved sources. Sand as delivered to the batching plant shall have uniform and stable moisture content. Determination of moisture content shall be made as frequently as possible; the frequency for a given job being determined by the Engineer-in-charge according to weather conditions following IS: 456-2000.

4.2.6.2 QUALITY:

The sand shall be clean, dense, durable, uncoated rock fragments as per IS: 383-1979. Sand may be rejected if it fails to meet any of the following quality requirements:

FINENESS: The fineness modulus of sand shall be between 2.20 to 3.20.

ORGANIC IMPURITIES IN SAND:

Colour, no darker than the specified standard in clause 6.2.2.of IS: 2386 Part II 1963 (Indian Standard method of test for aggregates of concrete Part II estimation of deleterious materials and organic impurities)

Sand shall be screened before use. If sand brought to site is not clean, it must be washed clean in water. Fine draft sand or sea sand or sand containing saline impurities shall on no account to be used.

SODIUM SULPHATE TESTS FOR SOUNDNESS:

The sand to be used shall pass Sodium or Magnesium Sulphate accelerated test as specified in IS: 2386(Part-V) 1963 for limiting loss on weight.

SPECIFIC GRAVITY:

The sand to be used shall have minimum specific gravity of 2.4

DELETERIOUS SUBSTANCE:

The amount of deleterious substances in sand shall not exceed maximum permissible limits prescribed in table-1, clause 3.2.1 of IS: 383-1970 (Indian Standard Specification for coarse and fine aggregates form natural source for concrete) when tested in accordance with IS: 2386-1963.

4.2.6.3 GRADING

4.2.6.4 The sand as batched shall be well graded and when tested by means of standard sieves,

shall conform to the limits given in table-4 of IS: 383-1970 and shall be described as fine aggregates, Grading zones, I, II, III and IV. Sand complying with the requirements of any of the four grading zones is suitable for concrete. However, sand conforming to the requirements of grading zone IV shall not be used for **reinforced cement concrete** work.

Sieve analysis of natural sand shall conform to the following limits of gradation.

I.S. Sieve size	Percentage of passing on Sieve		
	Gradi ng Zone- I	Gradi ng Zone- II	Gradi ng Zone- III
4.75 mm	90-100	90-100	90-100
2.36 mm	60-95	75-100	85-100
1.18 mm	30-70	55-90	75-100
600 micron	15-34	35-59	60-79
300 micron	5-20	8-30	12-40
150 micron	0-10	0-10	0-10

*It is recommended that the sand conforming to grading **zone-I to III** is suitable for use.*

4.2.7 COARSE AGGREGATES:

4.2.7.1 GENERAL

For the purposes of these specifications, the term "Coarse Aggregate" designate clean well graded aggregates, most of which is retained on 4.75 mm. I.S: Sieve and containing only so much finer materials as permitted for various types described under clause 2.2. of IS: 383-1970. Coarse Aggregate for concrete shall consist of uncrushed stone, or crushed stone and partially uncrushed and crushed stone.

Coarse Aggregates for concrete shall be procured by the Contractor from the approved quarries. The contractor shall, unless otherwise specified in the tender notice and subsequently on this basis in the contract, be responsible for payment of seignorages, quarry fees etc. on all materials.

Coarse aggregates as delivered to the batching plant shall generally have uniform and stable moisture content. In case of variations, clause 9.2.3 of IS 456-2000 shall govern during batching.

4.2.7.2 QUALITY

The coarse aggregate shall consist of naturally occurring (crushed or uncrushed) stones, and shall be hard, strong, durable, clear and free from veins and adherent coating, and free from injurious amounts of disintegrated pieces, alkali, vegetable matter and other deleterious materials. Coarse aggregate not conforming to any of the following requirements, shall be rejected.

LOS ANGLES ABRASION TEST

The abrasion value of aggregates when tested in accordance with the method specified in IS: 2386 (Part IV)-1963 using Los Angles machine, shall not exceed 30% for aggregates to be used in concrete for wearing surface and 50% for aggregates to be used in other concrete.

AGGREGATE CRUSHING STRENGTH TEST

Aggregates crushing value, when determined in accordance with IS: 2386 (Part IV)-1963 shall not exceed 45% for aggregates used for concrete other than wearing surface and 30% for wearing surfaces. As an alternative to the crushing strength test of aggregates, impact value shall be found out with the method specified in IS: 2386 (Part IV)-1963. The aggregates impact value shall not exceed 45% by weight for aggregates used for concrete for other than wearing surfaces and 30% by weight for concrete for wearing surface such as runways roads and pavements.

SOUNDNESS TEST

The coarse aggregates to be used for all concrete works shall pass a Sodium or Magnesium Sulphate accelerated soundness test specified in IS: 2386 (Part V)-1963 and the average loss of weight after 5-cycles shall not exceed the limits specified in clause 3.6 of IS: 383-1970.

SPECIFIC GRAVITY

The coarse aggregates shall have specific gravity of 2.60 minimum.

DELETERIOUS MATERIALS

The maximum quantity of deleterious materials in coarse aggregates shall not exceed the limits specified in Table of I.S: 383-1970 when tested in accordance with IS: 2386-1963.

4.2.7.3 SEPARATION

The coarse aggregates shall be separated into nominal sizes during production of the aggregates. Just prior to batching, the coarse aggregates shall be re-washed by pressure spray and finish screened on multi-desk vibrating screen capable of simultaneously removing undersized and over sized aggregate from each of the nominal aggregate. Aggregates entering the batches occur during intermittent batching then a dewatering screen will be required after the finish screens to remove the excess free moisture. Finish screens shall be mounted over the batching plant or on the ground adjacent to the batching plant. Finish screens shall be so mounted that, the vibration of the screen will not be transmitted to the batching bins or scales and will not affect the accuracy of the weighing equipment in any other manner.

The method and rate of feed for finish screening shall be such that, the screens are not over-loaded and result in a finished product, which meets the grading requirements of these specifications. Coarse aggregate shall be fed to the finish screens in a combination of alternations of nominal sizes, which will not cause noticeable accumulation of poorly graded coarse aggregates in any bin. The finish-screened aggregates shall pass directly to the individual batching bin in such a manner as to minimize breakage. Below 2.36 mm. materials passing through the finish screens shall be wasted unless it is routed back through a sand classifier in a manner, which causes

uniform blending with the natural sand being processed. Water from finish screening shall be drained in such a manner as to prevent aggregate wash water from entering the batching bins and weighing hoppers washing and finish screening requirements shall be subject to approval by the Engineer-in-charge.

Coarse aggregates for concrete shall be separated into various nominal maximum sizes specified in the relevant paragraph. Separation of the coarse aggregate into the specified sizes after finish screening shall conform to the grading requirements specified in Table-2 of IS 383-1970 when tested in accordance with IS: 2386 (Part II)-1963 (Method of test for aggregates for concrete part I) particles size and shape.

Coarse aggregate for mass concrete may be separated as previously herein specified. Separation of the coarse aggregates into the various sizes shall be such that when tested in accordance with IS 2386 (Part I) 1963 shall conform to the requirements specified in Table 3 of IS 383 – 1970.

Sieves used in grading tests shall be standard mesh sieves conforming to IS 460 (Part I) 1978 (specification for test sieves part I wire cloth test sieves)

4.2.8 PRODUCTION OF SAND AND COARSE AGGREGATE

4.2.8.1 GENERAL

Sand and coarse aggregate for concrete and sand for mortar and grout shall be obtained by the contractor from the approved sources. The approval of deposits by the Engineer-in-charge shall not be construed as consisting of the approval of all or any specified materials taken from the deposits and the contractor will be responsible for the specified quality for all such materials used in the work.

Tests performed on samples of sand and coarse aggregate obtained from the approved sources mentioned in the contract documents indicates that they are generally suitable. Well in advance of their usage on the works, the contractor shall have his own testing of materials and satisfy himself that they conform to the specification mentioned here in for use in the works.

No separate payment will be made for such tests. If sand and coarse aggregate are to be obtained from a deposit not previously tested and approved by the Engineer-in-charge, the contractor shall submit representative samples for pre-construction test and approval not less than 60 days before the sand and coarse aggregates are required for use. Each sample shall approximately consist of 100 Kg. of material. In addition to pre-construction tests for the approval of deposits, the Engineer-in-charge may test the aggregates for their suitability during their processing. The contractor shall provide such facilities as may be necessary for procuring representative samples free of cost at the aggregate processing plant and at the batch plant or mixing platform.

However, use and development of any such deposit shall be subject to the approval by the Engineer-in-charge. Any royalties (seignorages or other charges) required for the materials taken from deposits either owned by the State Government or controlled by the Department of Mines and Geology, Govt. of India or owned by any other person shall be paid by the contractor.

4.2.8.2 DEVELOPING AGGREGATE DEPOSITS

If the deposit is owned by the State Govt. and controlled by the department of Mines and Geology, the portion of the deposit used shall be located and operated so as not to detract the usefulness of the deposit or any other property of the Government and so as

to preserve, in so far as practicable, the future usefulness or value of the deposit. The contractor shall carefully clear the area of deposit from which the aggregates are to be produced, free from trees, roots, bushes, sods, solid unsuitable sand, gravel and other objectionable matter. Materials including stripping, removed from deposits owned by the Government, controlled by the Director of Mines and Geology, Government of India, and not used in the work covered by these specifications shall be disposed-off as directed.

Due to the overall construction programme, it is quite likely that more than one contractor may elect to use of the sources named in the contract document. The contractor shall be responsible for co-ordinating his work such that it does not interfere with the operations of other contractors who are also using any given source.

4.2.8.3 PROCESSING RAW MATERIALS

Processing of the raw materials shall include screening and washing as necessary to produce sand and coarse aggregate conforming to the requirements of paragraph 4.2.6 and paragraph 4.2.7. Processing of aggregate produced from any source owned by the State Government and controlled by the Department of Mines and Geology shall be done at an approved site. Water used for washing aggregate shall be free from objectionable quantities of salts, organic matter and other impurities. Oversize metal may be crushed to correct aggregate particle size and excess material in individual coarse aggregate size fractions may be crushed to give the largest practical yield of usable concrete aggregate.

Suitable types of crushers shall be used with the prior approval of the Engineer-in-charge for producing coarse aggregates. Crusher fines produced in the manufacture of coarse aggregates may be used in sand. Crushed stone, sand, crushed gravels and crusher fines if used shall be predominantly cubical in shape and shall be blended uniformly with natural sand by routing them together through sand classifier. Crusher coarse aggregate shall be blended uniformly with natural coarse aggregate by routing both together through the classifying screens.

In the process of developing and producing aggregates from approved sources for work under these specifications, **the provisions of environmental quality protection shall apply.**

4.2.8.4 COST

This shall be included in the applicable price bid in the schedule for concrete, filter and other works in which the aggregates are used of which prices shall include the cost for stripping, producing and transporting & storing the materials. The contractor shall not be entitled to any additional compensation for materials wasted from a deposit including crushed fines and materials, which have been discarded by the reasons of being above the maximum size specified for use or for any other reasons.

4.2.9 BATCHING

The contractor shall notify the Engineer-in-charge 24 hours before batching of concrete. Unless inspection is waived in each case, batching shall be performed only in the presence of an Engineer authorized by Engineer-in-charge.

The contractor shall provide, maintain, and operate the equipment as required to accurately determine and control the prescribed amounts of the various materials

entering the concrete mixtures. The quantities of cement, sand and each size of coarse aggregate entering each batch of concrete shall be determined by individual volume measurement or by weight as the case may be. Cement has to be weighed/measured in volume separately from the aggregates. Sand and coarse aggregates may be weighed with separate scale and hoppers.

The grading of aggregates shall be controlled by obtaining the coarse aggregate in different sizes and blending them in the right proportions, the different sizes being stacked in separate stock piles, the materials shall be stock piled a day before use. The grading of coarse and fine aggregates will be checked as frequently as directed by the Engineer-in-charge. Water shall be added by weight or measured by volume in calibrated tanks. The amount of added water shall be adjusted to compensate for any observed variations in the moisture contents. Determinations of moisture content in the aggregate shall be in accordance with IS: 2386 (Part-III) 1963 (Indian Standard Method of test for aggregate of concrete Part III). The amount of surface water carried by aggregates will be determined in accordance with Table-5 of IS: 456-2000.

Cement and aggregates are hauled from a central batching plant to the mixer. Each batch shall be protected during transit to prevent loss and to limit the pre-hydration of cement. Separate compartments with suitable covers shall be provided to protect the cements or they shall be completely enfolded in and covered by the aggregates to prevent wind loss. If cement are enfolded in moist aggregates or otherwise exposed to moisture and delay occurs between batching and the mixing, then extra cement shall be added to each batch. The extent of such extra cement will be to attain the required quality. **No separate payment** for this addition of extra cement shall be made.

4.2.10 MIXING

4.2.10.1 GENERAL

The concrete ingredients shall be thoroughly mixed in mechanical mixers designed to positively ensure uniform distribution of all the component materials throughout the concrete at the end of the mixing period. Mixing shall be done as per clause-9 of IS: 456-2000. The mixer should comply with IS: 1971-1985 (IS Specifications for batch type concrete mixers)

The concrete as discharged from the mixer shall be uniform in composition and consistency from batch to batch. Workability shall be checked at frequent intervals as per IS: 1199-1959. Mixer shall be examined regularly by the Engineer-in-charge or his authorized Engineer for changes in conditions due to accumulation of hardened concrete or mortar or to wear of blades. The mixing shall be continued until there is a uniform in colour and consistency and to the satisfaction of the Engineer-in-charge. If there is, aggregation after unloading, the concrete should then be remixed.

Any mixer that at any time produces unsatisfactory mix shall not be used until repaired. If repair attempts are unsuccessful, a defective mixer shall be replaced. Batch capacity shall be at least 10% of but not in excess of the rate capacity of the mixer unless otherwise authorized by the Engineer-in-charge.

4.2.10.2 CENTRAL MIXERS

Water shall be admitted prior to and during charging of the mixer with all other concrete ingredients. After all materials are in the mixer, each batch shall be mixed for not less than the time specified by the Engineer-in-charge. The minimum mixing time shall be 2 minutes. The minimum mixing time specified is based on average mixer

performance. The Engineer-in-charge will adjust the minimum mixing time as required by the observations of the mix delivered from mixer. Excessive over mixing which require addition of water to maintain the required concrete consistency shall not be permitted.

In addition to IS: 1791-1985, the mixing equipment shall conform to the following further requirements.

1. Plant configuration shall be such that the mixing of each mixer can be observed from the safe location, which can be easily reached from the control station. Provisions shall be made so that the operator can observe the concrete in the receiving hopper or bucket as it is being dumped from the mixers.
2. Each mixer shall be controlled with timing device, which will indicate the mixing period and assure compliance of required period of mixing.
3. The batch plant shall be equipped with an interlocking mechanism, which will prevent concrete batches from entering mixers, which are not empty.

4.2.10.3 TRUCK MIXERS

Each truck mixer shall be equipped with accurate water meter located between the supply tank and mixers with a dial or digital indicator and a reliable revolution counter, located near the water meter, which can be readily reset to Zero for indicating the total number of revolutions of the drum for each batch. Each mixer shall have affixed there to a metal plate on which the drum operations in terms of volume for both mining and agitating and the maximum and minimum speeds of rotation of the drum are mainly marked.

Mixing shall be continued for the minimum period specified and may be increased and number of revolutions, speed of the drum may be such that the mixture as delivered from the mixer has uniform colour and consistency to the satisfaction of Engineer-in-charge. In no case shall the design water content be exceeded.

Concrete shall be discharged within half an hour after the introduction of the water and cement into the mixer. Each batch of concrete when delivered at the job site from commercial ready mix plants shall be accompanied by a written certificate of batch weights and time of batching.

4.2.11 TEMPERATURE OF CONCRETE

Fresh structural concrete and fresh canal lining concrete shall be placed at temperature of 15°C to 30°C . During hot or cold weather the concreting should be done as per the procedure set in IS: 7861 (Part I) 1975 or IS: 7861 (Part II).

The temperature will be determined by placing a thermometer in the concrete immediately after sampling at the site of placement. The temperature of concrete at the batch plant shall be adjusted to assure that the specified concrete temperature is attained at the placement.

In case of concrete in hot weather condition, the contractor shall employ effective means such as pre-cooling of aggregates and mixing water and placing at nights as necessary to maintain the temperature of the concrete as it is placed at the specified limit. The methods of pre-cooling shall be subject to approval by the Engineer-in-charge.

Then contractor shall not be entitled for any additional compensation due to the foregoing requirements.

4.2.12 FORMS

4.2.12.1 GENERAL

Form shall be used wherever necessary to confine the concrete and shaping it to the required lines. If a type of form does not consistently perform in an acceptable manner as determined by the Engineer-in-charge, the type of form shall be changed and method of erection shall be modified by the contractor subject to approval of the Engineer-in-charge.

Plumb and string lines shall be installed before and maintained during concrete placement. Such lines shall be used by the contractor's personnel and by the Engineer-in-charge and shall be in sufficient number and properly installed as determined by the Engineer-in-charge. During concrete placement, the contractor shall continuously monitor plumb and string lines, form positions and immediately correct the deficiencies.

Forms shall have sufficient strength to withstand the pressure resulting from placement and vibration of the concrete and shall be maintained rigidly in position. Where form vibrators are to be used, forms shall be sufficiently rigid to effectively transmit energy from the form vibrators to the concrete while not damaging or altering the positions of forms. Forms shall be sufficiently tight to prevent loss of mortar from the concrete. Chamfer strips shall be placed to produce bevelled edges on permanently exposed concrete surfaces. Interior angle intersecting concrete surfaces and edges of construction joints shall not be bevelled except where indicated on the drawings.

Suitable struts, stiffeners, or ties shall be used for the formwork wherever necessary. All supports shall be braced and cross-braced into two directions. All splices and braces shall be secured by bolting unless specially intended otherwise. All struts shall be firmly supported against settlement and slipping, by suitable means as directed. All supports shall be cut square at both ends and firmly supported against settlement and slipping. When the formwork is supported on soil, sleepers etc. shall be used to properly disperse the loads. In case the supports rest on already completed beam or slab suitable props shall be provided under the latter.

The formwork shall be of well-seasoned timber or steel. When timber forms are used, they shall be lined with MS sheet or other suitable smooth faced non-absorbent materials as specified. Supports may be of timber or steel. Suitable wedges in pairs to facilitate adjustment and subsequent releasing of forms shall be provided preferably at the upper end of the supports. The details of the proposed formwork and supports shall be submitted to the Engineer-in-charge and shall be approved before erection.

In case of columns, retaining walls or deep vertical component, the height of the column shall facilitate the placement and compaction of concrete and suitable arrangement may be made for securing the forms to the already poured concrete for placing the subsequent lifts. No steel tie or wires used for securing this formwork shall be left exposed-off the face of the finished work.

Suitable inserts for block-outs for electrical and other service fixtures where necessary shall be provided in the required locations as specified. At the time the concrete is placed in forms, the surfaces of the forms shall be free from encrustations of mortar grout or other foreign material. Before concrete is placed, the surface of the forms shall be oiled with commercial forms of oil.

4.2.12.2 REMOVAL OF FORMS

The stripping of formwork shall conform to clause-11.3 of IS: 456-2000. The contractor shall be liable for damage and injury caused by removing forms before the concrete has gained sufficient strength. Forms on sloping faces of concrete, such as forms on the watersides of wrapped transitions shall be removed as soon as the concrete has attained sufficient stiffness to prevent sagging. Any needed repairs or treatment required on such sloping surfaces shall be performed at once and be followed immediately by permitted curing.

To avoid incessant appearance in concrete that might result from swelling of forms, wood forms for wall openings, shall be loosened as soon as the loosening can be accomplished without damages to the concrete. Forms for the opening shall be constructed as to facilitate such loosening. Forms shall be removed with care so as to avoid injury to concrete and any concrete so damaged shall be repaired in accordance with paragraph 4.2.20.

4.2.12.3 COST

The cost of furnishing all materials and performing all works for constructing forms including any necessary treatment or coating of forms is included in the price bid of item of form work provided in the bill of quantities.

4.2.13 TOLERANCES FOR CONCRETE CONSTRUCTION

4.2.13.1 GENERAL

Tolerances are defined as allowable variations from specified lines, grades, and dimensions and as the allowable magnitude of the surface irregularities. Allowable variations from specified lines, grades and dimensions are listed as given under subparagraph 4.2.13.2 below.

The intent of this paragraph is to establish tolerances that are consistent with modern construction practice that is governed by the effect that, permissible variations may have upon a structure. The Govt. reserves the right to diminish the tolerances set forth therein if such tolerances impair the structural action, operational function or architectural appearance of a structure or position thereof.

Concrete shall be within all stated tolerances even though more than one tolerance may be specified for a particular concrete structure, provided that the specified variation for one element of the structure shall not apply, when it will permit another element of the structure to exceed its alterable variation. Where tolerance is not specified for particular structure, tolerances shall be those specified for a similar work. As an exception to clause-2 of the general provisions, specific tolerance shown here in connection with any dimension shall govern. The contractor shall be responsible for finishing the concrete forms within the limit necessary to ensure that the completed work will be within the tolerance limit specified. The defective work where the tolerance limit is exceeded shall be remedied in accordance with the subparagraph 4.2.13.2 & 4.2.13.3 as below.

4.2.13.2 VARIATION FROM SPECIFIED LINES, GRADES AND DIMENSIONS

Hardened concrete structure shall be checked by the contractor and will be subject to such inspection and measurement as needed to determine that the structures are within the tolerance as specified below.

Variation is defined as the distance between the actual position of the structure or

any element of the structure and the specified position in plan for the structure or the particular element. Plus or minus variations shown as indicated or permitted from actual position up or down and in or out from the specified position in plan. Variations not designated as plus or minus indicate the minimum deviation permitted between designated successive points on the completed element of construction.

Specified position in plan is defined as the lines, grade and dimensions described in those specifications or shown on the drawings or as otherwise prescribed by the Engineer-in-charge.

4.2.13.3 CONCRETE SURFACE IRREGULARITIES

4.2.13.4 GENERAL

Bulges, depressions and offsets are defined as concrete surface irregularities. Concrete surface irregularities are classified as "abrupt" or "gradual" and are measured relative to the actual concrete surface.

ABRUPT SURFACE IRREGULARITIES

Abrupt surface irregularities are defined herein as offsets such as those caused by misplaced or loose forms, loose knots in form of Lumber, or other similar forming faults. Abrupt surface irregularities are measured using a straight edge held firmly against the concrete surface over the irregularity and the magnitude of the offset is determined by direct measurement.

GRADUAL SURACE IRREGULARITIES

Gradual surface irregularities are defined herein as bulges and depressions resulting in gradual changes on the concrete surface. Gradual surface irregularities are measured using a suitable template conforming to the design profile of the concrete surface being examined. The magnitude of the gradual surface irregularities is defined herein as measures of the rate of change in slopes of the concrete surface.

The surface irregularities shall not exceed 6 mm for bottom slab and 12 mm for side slopes when tested with a straight edge of 1.5 meter in length.

The magnitude of gradual surface irregularities on concrete shall be checked by the contractor to ensure that the surfaces are within the specified tolerance. The Engineer-in-charge will also make such checks of hardened concrete surfaces as determined and ensure necessary compliance with such specifications.

4.2.13.5 HARDENED CONCRETE NOT WITHIN SPECIFIED TOLERANCES

Hardened concrete which is not within specified tolerances shall be repaired to bring it within those tolerances. Such repair shall be in accordance with paragraph 4.2.20 and shall be accomplished in a manner approved by the Engineer-in-charge. Such repair shall be done only after consultation with a representative of Engineer-in-charge regarding the method of repair. The Engineer-in-charge shall notify as to the time when repair will be performed.

Concrete shall be finished in a manner, which will result in concrete surface with a uniform appearance. The fins and any rough projections can then be rubbed down and the whole surface brought to an even finish by rubbing with a wooden float using a mortar of one part of cement by two parts of coarse sand as an abrasive. The mortar at

the same time filling the voids, a neat cement works shall then be applied to give a smooth surface. If the concrete has set hard, the fins and rough projections, if any shall be removed by using carborandum brick or a paved grinding machine by chipping, before finishing-off with the smoothing wash. If the work of chipping is not done with care or if the surface exposed after removal of the forms cannot be satisfactorily dealt with in this manner due to bad work or for other reasons, a coat of cement plaster of 1:2 mix of the thickness as ordered by Engineer-in-charge shall be applied. No extra payment will be given for finishing concrete surface as instructed above in this clause.

4.2.13.6 PREVENTION OF REPEATED FAILURE TO MEET TOLERANCES

When concrete placements result in hardened concrete that does not meet the specified tolerance, the contractor shall submit to the Engineer-in-charge an outline of all preventive actions such as modification to the form system, modified procedure for setting screeds and different finishing techniques to be implemented by the contractor to avoid repeated failure.

The Engineer-in-charge **reserves the right to delay concrete placement** until the contractor implements such preventive actions, which are approved by the Engineer-in-charge.

4.2.14 REINFORCING BARS

Reinforcing bars shall be placed in the concrete as shown in the drawings or as directed. For anchoring the concrete to the hard rock, provision of anchor bar is made in the drawing and contractor shall place these anchor bars to the spacing and depth shown in the drawings. The contractor shall make his own arrangement for procurement of steel of required specification of reputed factory for the work. Transportation from the place of supply to work site and all incidental charges will be borne by the contractor.

4.2.14.1 MATERIALS

Unless shown otherwise on the drawings the reinforcement to be used shall be High Yield strength deformed bars of grade Fe-415 conforming to IS: 1786-1985 specification for high yield strength deformed steel bars and wire for reinforced cement concrete.

4.2.14.2 PLACING THE GRILLS

Reinforcement shall be bent and fixed in accordance with the procedure specified in IS: 2502-1963 (code of practice for bending and fixing of bars for concrete reinforcement). All reinforcement shall be placed and maintained in the position shown in the drawings. Splices shall be located where shown in the drawing, provided that the location of the splice may be altered subject to written approval of the Engineer-in-charge.

Subject to the written approval the Engineer-in-charge, the contractor may for his convenience, alter splice bars at additional locations other than those shown on the drawings. All additional splices allowed shall be **at the expense of the contractor**. In order to meet design and space limitation on splicing, some bent bars may exceed usual clearance, cutting and bending of such bars from stock lengths may be required at the site.

Unless otherwise prescribed, placement dimensions shall be to the centre line of the bars. Reinforcement will be inspected for compliance with requirement as to size, shape, length, spacing and splicing etc.

Before reinforcement is embedded in concrete, the surface of the bars shall be cleaned of heavy flaky rust, loose scale, dirt, grease or other foreign substances, which in the opinion of the Engineer-in-charge are objectionable. Heavy flaky rust that can be removed by firm rubbing with burlap or equivalent treatment is considered objectionable.

As specified in clause 12.3.1 of IS: 456-2000, unless otherwise specified by the Engineer-in-charge, reinforcement shall be placed with the following tolerances.

- a. For effective depth 200 mm or less \pm 10 mm
- b. For effective depth more than 200 mm \pm 15 mm

The cover in no case be reduced by more than one third of specified cover or 5 mm whichever is less. Reinforcement shall be securely held in position so that it will not be displaced during the placing of the concrete and special care shall be exercised to prevent any disturbances of the reinforcement in concrete that has already been placed. Welding of bars shall be done as directed by the Engineer-in-charge and in conformity with the requirements of clause 12.4 of IS: 456-2000. Concrete cover shall be maintained as shown on the drawings.

4.2.14.3 REINFORCEMENT DRAWINGS

The Engineer-in-charge will supply drawings of reinforcement details and bar bending schedules for adoption.

4.2.14.4 MEASUREMENT AND PAYMENT

Measurement for payment of reinforcement bars will be based on the weight of the bars placed in the concrete in accordance with the drawings supplied by the Engineer-in-charge when conformance with these specifications drawings has been determined at the time of embedment. Except as otherwise provided below, payment for furnishing and placing reinforcing bars will be made at the unit price bid in the bill of quantities for furnishing and placing reinforcement bars which unit price shall include the cost of reinforcing bars, attaching wire, cutting, bending, cleaning, tying the grills, securing and maintaining in position of the reinforcing bars as shown in the drawings.

The total weight of bars placed as reinforcement in concrete shall be arrived at by adding the products of lengths of each size and mass per meter (vide Table-1 and Para 6.2.1 of IS: 1786-1985) of that size of rod.

4.2.15 PREPARATION FOR PLACING

4.2.15.1 GENERAL

No concrete shall be placed until formwork installation of items to be embedded and preparation of surface involved in the placement have been approved.

The contractor shall supply concrete placement checkout cards/ OK card

(Placement Register) satisfactory to the Engineer-in-Charge and shall provide a watertight container for such cards at the convenient location near each individual concrete placement site. The cards shall list all the various work items for example "cleanup" and "embedded items" required prior to placement of concrete. After each work item for an individual placement has been completed that item on the cards shall be signed by contractor or his representative signifying completion of the required work. Engineers authorized by the Engineer-in-Charge will inspect the work during and after completion of each phase of the preparation and if the work is satisfactory will sign the checkout card (placement register). Approval of preparation of placement will not be complete until the contractor or his representative and above authorized Engineer have approved by signature to all applicable items for the placement.

All surfaces of forms and embedded materials shall be free from curing compound, dried mortar of previous placements and foreign substance before the adjacent or surrounding concrete placement is begun.

Prior to beginning concrete placement, the contractor shall make ready a sufficient number of properly operating vibrators and operators, and shall have readily available additional vibrators to replace defective one during the progress of the placement. The Engineer's representative at the placement may delay the start of the concrete placement until the number of working vibrators available is acceptable.

4.2.15.2 FOUNDATION SURFACES

All surfaces upon or against which concrete is to be placed shall be free from frost, ice, water, mud and debris. Rock surface shall be free from oil, objectionable coatings, and loose semi-detached and unsound fragments. Immediately prior to placement of concrete, surfaces of rock shall be washed with an air water jet and shall be brought to uniform surface dry condition.

Earth foundation surfaces shall be wet to a depth of 15 cm or to impermeable material whichever less before placement.

4.2.15.3 CONSTRUCTION JOINTS

Construction joints are defined as concrete surfaces upon or against which concrete is to be placed and to which new concrete is to adhere, but which have become so rigged that the new concrete can not be incorporated integral with that previously placed. The provision of construction joints shall conform to clauses 12.4.1 and of IS: 456-978.

When the work has to be resumed on a surface, which has hardened, such surface shall be roughed. It shall than be swept clean thoroughly and wetted. For vertical joints, neat cement slurry shall be applied on the surface before it is dry. For horizontal joints the surface shall be covered with a layer of mortar about 10 to 15 mm thick, composed of cement and sand in the same ratio as the cement and sand in concrete mix. This layer of cement slurry or mortar shall be freshly mixed, applied immediately before placing of the concrete.

Where the concrete has not fully hardened, all litanies shall be removed by scrubbing the wet surface with wire or bristle, brushes, care being taken to avoid

dislodgment of particles or aggregate. The surfaces shall be thoroughly wetted and all free water removed. The surface shall then be coated with neat cement slurry. On this surface, a layer of concrete not exceeding 15 mm. in thickness shall first be placed and shall be well recommend against old work, particular attention being paid to corners and close spots, and work thereafter shall proceed in the normal way.

4.2.15.4 CONTRACTION JOINTS

Contraction joints serve to provide for volumetric shrinkage of monolithic concrete and or movement between monolithic units at established joints, thus preventing formation of objectionable shrinkage cracks elsewhere in concrete. Prior to application for wax based curing compound to contraction joints, the surfaces of all joints shall be cleaned thoroughly of accretion of concrete or other foreign material by scraping, chipping or other means approved by the Engineer-in-Charge. Water stops, reinforcing bars and other embedded items shall be free of curing compound when adjoining concrete is placed.

4.2.16 PLACING OF CONCRETE

4.2.16.1 GENERAL

The contractor shall notify the Engineer-in-Charge before batching 'begins for placement of concrete. Placing shall be performed only on the presence of an authorised Engineer's representative. Placement shall not begin until after preparations are complete and the concrete placement check out card has been signed by the contractor or his representative and the authorized representative of the Engineer-in-Charge substantiating completion of all preparation for that placement.

All surface upon or against which concrete is to be placed shall be prepared in accordance with paragraph 4.2.15.

Re-tampering of concrete will not be permitted for any concrete, which has become so stiff that proper placing cannot be assured.

Concrete shall not be placed in standing water except with written permission of the Engineer-in-Charge and the method of placing shall be subject to approval. Concrete shall not be placed, in running water and shall not be subjected to running water until after the concrete has hardened. Concrete shall be deposited as nearly as practical in its final position and shall not be allowed flow in such a manner that the lateral movement will cause of the coarse aggregate separated from the concrete mass. Methods and equipment employed in depositing concrete in forms minimize clusters of coarse aggregates. Clusters that occur shall be scattered before the concrete is vibrated. Forms shall be constantly monitored and their position adjusted as necessary during concrete placement in accordance with paragraph 4.2.12 and 4.2.13.

All concrete except canal lining shall be placed in approximately horizontal layers. The depth of layers shall not exceed 15 cm. The Engineer-in-Charge reserves the right to require lesser depth of layers where concrete cannot otherwise be placed and consolidated in accordance with the requirements of these specifications. All construction joints which intersect exposed concrete surface shall be made straight and level to plumb except as shown otherwise on the drawings. The placing of concrete shall be in accordance with clause 12.2 of IS: 456-1978.

If concrete is placed monolithically around openings having vertical dimensions greater than 60 cm or if concrete in decks, floor slabs or other similar part of structures is placed monolithically with supporting concrete, the following requirements shall be strictly observed:

- (1) Concrete shall be placed up to the top of the formed opening at which point further placement will accommodate settlement of fresh concrete. If concrete levels are specified beneath nearly horizontal structural members such as decks floor slabs, beams and girders or the levels being between the nearly horizontal members and the vertical supporting concrete below, concrete shall be placed to the bottom of the bevels before delay of placement.
- (2) The last 60 cm or more of concrete placed below horizontal members or bevels shall be placed with a slump of 50 mm or less and shall be thoroughly consolidated.

In placing concrete on uniform slopes so steep as to make internal vibration of the concrete impractical without footing, the concrete shall be placed in non-vibrating slip forms with screed extending approximately 0.75 meters back from its leading edge. Concrete ahead of the slip form screed shall be consolidated by internal vibrations so as to ensure complete filling under the slip form.

A cold joint is an unplanned joint resulting when a concrete surface hardens before the next batch is placed against it. Cold joints would be allowed only in the event of equipment break down or other unavoidable prolonged interruption of continuous placing. If such unavoidable delay in placing occurs, which make it that, unconsolidated concrete may harden to the extent that later vibration will not fully consolidate it, the contractor shall immediately consolidate such concrete to a stable and uniform slope. If the delay of placement is short enough to permit penetration of the underlying concrete, placement shall resume with particular care being taken to thoroughly penetrate and re-vibrate the concrete surface placed before the delay. If concrete cannot be penetrated with vibrator, the cold joint shall be then treated as a construction joint. Care shall be taken to prevent cold joints when placing concrete in any part of the work. The concrete placing rate shall ensure concrete is placed while previously placed adjacent concrete is plastic, so that the concrete can be made monolithic by normal use of vibrators/ tamping.

Concrete shall not be placed in rain sufficiently heavy or prolonged to wash mortar from concrete. A cold joint may necessarily result from prolonged heavy rainfall.

There shall not be any additional payment, over the unit price bid in the schedule for concrete by reason for any limitation in the placing of concrete, required under the provisions of this paragraph.

4.2.16.2 TRANSPORTATION

The transportation of concrete shall conform to clause 12.1 of I.S: 456-1978.

The methods and equipment used for transporting concrete from the batch plant to its final position in the placement and the time that elapses during transportation shall not cause measurable segregation of coarse aggregate or slump loss during transportation exceeding 5 centimetres.

Concrete shall be deposited as practical to its final position. The use of Aluminium pipe or Aluminium chutes for delivery of concrete will not be permitted. Concrete buckets shall be capable of promptly discharging concrete of the specified mix design and the dumping mechanism shall be capable of discharging at one location, small portions of concrete from a full bucket.

If used to transport concrete, the truck mixers shall meet the applicable requirements of paragraph 4.2.10. The transporting equipment for placing concrete shall readily handle the place concrete of the specified slump. The Contractor shall when directed, replace in-adequate transporting equipment with acceptable equipment.

4.2.16.3 COMPACTION

The compaction of concrete shall conform to clause 12.3 of I. S 456-1978.

Concrete shall be consolidated by vibrators/ tampers. The vibrations shall be sufficient to remove all undesirable air voids from the concrete, including the air voids trapped against the forms. After consolidation, the concrete shall be free of rock pockets and honey comb areas and shall be closed snugly against all surfaces of forms and embedded materials. All concrete shall be properly consolidated before it hardens.

Except as herein after provided, consolidation of all concrete shall be by immersion type vibrators. Immersion type vibrators shall be operated in nearly vertical position and the vibrating head shall penetrate and re-vibrate the concrete in the upper portion of the underlying layer. Care shall be exercised to avoid contact of the vibrating head with embedded items and with formed surfaces, which will later be exposed to view. Concrete shall not be placed upon either plastic concrete until the previously placed concrete has been thoroughly consolidated.

Form vibrators shall be used in conjunction with slip form lining machines to consolidate concrete in canal linings. Such vibrators shall be arranged for effective, uniform consolidation for the concrete. The Engineer-in-Charge or his representative may remove samples of the hardened concrete for testing and examination, and the Contractor shall repair, at no cost to the Government, the concrete from which such samples are removed.

Immersion type vibrators shall be operated at speeds of at least 7000 revolutions per minute when immersed in concrete. Form vibrators shall operate at speeds of at least 8000 revolutions per minute when being used to consolidate concrete. The Contractor shall immediately replace improperly operating vibrators with acceptable vibrators.

4.2.17 FINISHES AND FINISHING

The requirements for finishing of concrete surface shall be as specified in this paragraph, paragraph 4.2.12 and 4.2.13 or as otherwise indicated on the drawings. The Contractor shall notify the Engineer-in-Charge before finishing concrete. Unless inspection is waived, in each specific case, finishing of concrete shall be performed only when an Engineer's representative is present. Concrete will be tested by the Engineer-in-Charge in accordance with paragraph 4.2.13 where necessary to determine whether the concrete surface is within the specified tolerances.

Finished concrete which is not within the specified tolerances shall be repaired in accordance, with paragraph 4.2.20. Interior surfaces shall be sloped for drainage where shown on the drawings or as directed. Surfaces which will be exposed to the weather and which would normally be level shall be sloped for drainage.

Floating may be performed by use of hand or power driven equipment. Floating shall be started as soon as the screed surface has stiffened sufficiently and shall be the

minimum necessary to produce a surface that is free from screed marks and is uniform in texture. Joints and edges shall be tooled where shown on the drawing or as directed.

After the surface of roadway slabs of concrete bridges have been wood floated, the surfaces shall be given a broom finish. The finish shall be applied when the water sheet has practically disappeared. The broom shall be drawn transversely across the pavement with adjacent strokes slightly overlapping. The brooming shall be completed before the concrete is in such a condition that the surface will be torn or unduly roughened by the operation. The finished surfaces shall have a uniform appearance and shall be free of corrugations exceeding 1.5 millimetres in depth. Broom shall be of a quality, size and construction and be operated as to produce a surface finish of satisfaction to the Engineer-in-Charge.

The finishing in lining shall be in accordance with Clause 5.7 of IS: 3873-1993. The finished surface shall be equivalent in evenness, smoothness and free from rock pockets and surface voids to that obtainable by effective use of a long handled steel trowel. Where the surface produced by lining machine meets the specified requirements, no further finishing operations will be required.

4.2.18 PROTECTION

The contractor shall protect all concrete against damage until its final acceptance by the Engineer-in-Charge. The contractor shall provide protection to prevent erosion to fresh concrete whenever precipitation either periodic or sustaining is imminent or occurring.

When precipitation appears imminent, the contractor shall immediately make ready at the placement site all materials, which may be required for protection of fresh concrete. The Engineer-in-Charge may delay placement of concrete until adequate provisions for protection against weather are made.

All fresh concrete surfaces shall be protected from contamination and from foot traffic until concrete has hardened. Hardened concrete surfaces, which have to receive finish, shall be protected against damage from foot traffic and the construction activity by covering with protective mats, plywood, or by other effective means. Method of protection shall be subject to approval by the Engineer-in-Charge.

4.2.19 CURING

4.2.19.1 GENERAL.

The contractor shall furnish all materials and perform all work required for curing concrete. All concrete including bed and sides of canal lining shall be cured by water curing.

The pre-cast slab for canal lining shall be cured by keeping them immersed in water for seven days and by sprinkling water for another 21 days with straw canvass, Hessian or similar materials cover over slab.

The uniformed top surfaces of bridges decks shall be cured for 28 days with a damp sand cover or curing mat cover. The sand or curing mats shall not be kept so wet as to allow water to drain from them, which may stain other concrete. The sand or curing mats shall be removed after expiry of the curing period.

All concrete surfaces shall be treated as specified to prevent loss of moisture from the concrete until the required curing period elapsed or until immediately prior to placement of other concrete or back fill against those surfaces. Only sufficient time to prepare construction joint surfaces and to bring them to a surface dry condition shall be allowed between discontinuance of curing and placement of adjacent concrete.

Forms shall be removed within 24 hours after the concrete has hardened sufficiently conforming to IS: 456-2000 to prevent structural collapse or other damage by careful form removal. Where required, repair of all minor surface imperfection shall be made immediately after form removal. Prior to curing, minor surface repair shall be completed within 2 hours after form removal and shall be immediately followed by the initiation of curing by the applicable method specified herein. Concrete surfaces shall be kept continuously moist after form removal until initiation of curing.

4.2.19.2 MATERIALS

Concrete cured with water shall be kept wet at least for 28 days from the time the concrete has attained sufficient set to prevent detrimental efforts to the concrete surfaces. The concrete surfaces to be cured shall be kept wet covering them with water saturated materials by using a system of perforated pipes, mechanical sprinklers or porous hose or by other methods which will keep all surface continuously wet. All curing methods are subject to approval of the Engineer-in-charge.

4.2.19.3 COST

The cost of furnishing of all materials and performing all work for curing concrete shall be included in the price bid in the bill of quantities for the concrete on the particular curing methods are required.

4.2.20 REPAIR OF CONCRETE

Concrete shall be repaired in accordance with the clauses 5.7 of IS 3873-1978. Imperfections and irregularities on concrete surface shall be corrected in accordance with the paragraph 4.3.13 and clause 5.7 of IS: 3873-1978.

Repair to concrete surfaces and addition where required shall be made by cutting regular opening into the concrete and placing fresh concrete to the required lines. The chipped openings shall be sharp and shall not be less than 70mm in depth. The fresh concrete shall be reinforced and chipped and trowel to the surface of the openings. The mortar shall be placed in layers not more than 20mm in thickness. After being completed, each layer shall be compacted thoroughly. All exposed concrete surface shall be cleaned of impurities, lumps of mortar or grout and unsightly stains.

The cost of furnishing all materials and performing all work required in the repair of concrete shall be borne by the contractor.

4.2.21 MEASUREMENT OF CONCRETE

Measurement for payment of concrete required to be placed directly upon or against surfaces of excavation will be made to the lines for which payment for excavation is made.

The unit of measurement will be in cubic metre. In measuring concrete for payment, the volume of all opening, fixtures embedded pipes and metalwork each of which is larger than 0.1 square meters in cross section will be deducted.

4.2.22 PAYMENT FOR CONCRETE

Payment for concrete shall be made at the applicable unit price in therefor in the bill of quantities, which unit price shall include the cost of furnishing all materials and performing all works required for the concrete construction except that payment for furnishing and placing reinforcement bars and form work which shall be made at the respective unit price's bid thereof in the schedule.

4.2.23 DETAIL SPECIFICATION OF EXPANSION JOINTS/ CONSTRUCTION JOINTER (EJ/CJ) FOR CANAL STRUCTURE

4.2.24 Description of Items

The joint should be left in concrete/masonry in required places as per drawing and design. Embedded parts if any will have to be provided prior to casting of concrete/construction of masonry. Old surface of the concrete/masonry joints should be made clean free of dirt, grease, protrusions or any objectionable materials as per the direction of the Engineer-in-charge. The face of the joints should be made straight. The surface of joints should be painted with bitumen/ coal tar and fitted with the approved sealing materials like bituminous filler boards, etc. The adjacent concreting masonry then only can be constructed.

In the case of P.V.C. water stop, the pieces should be jointed together at the site by vulcanising thoroughly to make it water tight having sufficient strength to withstand the designed water pressure exerted on it.

In case of copper seal, the thickness of the copper sheet should be of 16 gauge (1.63 mm) and minimum of 0.6m wide with 'V', 'U' or 'Z' groove of size 2.5 cm. at its longitudinal axis. The groove should be perfectly straight and uniform. Adjacent copper sheet should be perfectly braced together on both sides for the whole width by butting the two sheets against each other. If lapping between adjacent sheet are given, the maximum lapping should be 5 cm. and should be held together tight. Brazing should be done on both sides for the whole width. The joints should be braced, watertight and should be capable of withstanding the hydraulic pressure exerted on it. M.S. anchor rods of 6 mm to 8mm dia and 30cm long with hook on outer side and should be braced with the copper sheet @ 50 cm centre to centre approximately on both sides of copper sheet preferably staggered. The minimum length of the rod to be brazed is minimum 5 cm. and brazing should be done on both side of the rod.

The edges of the copper sheet should also be given a link at about 0.5 M. interval to have a better grip with concrete. The brazing should be done as per relevant IS specification.

The P.V.C water stop shall be dense, homogeneous and free from holes and other imperfections. The cross section of the water stop shall be uniform along its lengths and thickness shall be symmetrical.

Location and embedment of the P.V.C./Copper water stops shall be as shown on the drawings, with approximately one-half of the width. Water stops shall be embedded in the concrete on each side of the joints. In order to eliminate faulty installation that may result leakage, care shall be taken that the water stops shall be installed to form continuous watertight diaphragm in the joints. Unless otherwise shown, adequate provision shall be made to protect the water stops during the progress of the work.

Additional vibrations over and above that used for adjacent concrete placement shall be carried out to assure complete embedment of the water stops in the concrete. Larger pieces of aggregate near the water stops shall be removed by hand during embedment to assure complete contact between the water stop and surrounding concrete.
